Introduction

This 12th edition of The Colle System is arranged in four parts. The initial section of the book is written in the form of a series of lessons designed to thoroughly familiarize the reader with the sound principles of this opening system. Each lesson incorporates a group of questions to permit the student to test himself on comprehension of the ideas in that lesson before proceeding to new material.

The second part of the book comprises 27 fully annotated games to permit the student to see how the author utilized the opening to win or draw against all levels of playing strength, including a world champion!

Part Three examines White's play when confronted by an opponent who elects to play a King's Indian Defense structure against your Colle System.

In Part Four, the author summarizes the principal lines of the Colle System in resume form as a valuable review and further orientation in this durable and solid opening system. The author cites half a hundred games to further illustrate the principal features of this versatile opening, including numerous examples of Colle's treatment of his opening.

Edgard Colle is one of those chess masters of whom we will never know his full potential because he died before reaching his prime - like Morphy, Pillsbury, Noteboom, Charousek and Junge. He was born in Ghent May 18, 1897 and was a contemporary of Belgium's best known chessplayer, George Koltanowski. They met in many chess battles during Colle's brief life. Colle suffered from poor health most of his life. Sir Harry Golombek says of Colle: He possessed "enormous combinational ability" and "produced a flow of beautiful brilliancies." Fred Reinfeld produced a collection of his games, "51 Brilliant Chess Masterpieces" to record for posterity the sparkling ideas of this youthful genius. He is especially remembered today for his opening system which is the subject of this book, an opening with which Colle scored many tournament victories.

Colle began his tournament record by winning the championship of his home city in 1917. He opened his international career with an exceptional eight out of ten points and equal Third with Maroczy and Reti at Scheveningen 1923. In his first appearance at the annual Christmas tournament at Hastings 1923/24, he was equal 3rd with Yates. 1924 was a busy year, starting with an equal 7th with Opocensky and Steiner at the very strong Meran tournament; a third place at the Paris Olympiad (played on an individual, not team, basis); and matches with Euwe and Koltanowski.

Colle scored a number of his finest tournament results in 1926, beginning with a First at Amsterdam ahead of Tartakower and Euwe. He placed Second to Euwe at Weston-super-Mare; 4th at Bartfield; and equal 7th with Reti in Budapest. He capped the year with a First at Meran ahead of such greats as Spielmann, Grunfeld, and Tartakower, a true Grandmaster result. At the end of the year he was Second at Hastings 1926/27.

Other notable tournament results included a 3rd at Neindorf 1927; equal First with Frank Marshall and Takacs at Hastings 1928/29; 3rd at Barcelona 1929; First at Scarborough 1930 ahead of Maroczy, Rubinstein, Ahues, Sultan Khan and Grunfeld; and a 3rd place tie with Nimzowitsch and Ahues at Liege 1930.

Colle might have been more successful in tournament play had he not been compelled to play so frequently. He participated in more than fifty tournaments in ten years! His last tournament was at Rotterdam 1931 where he placed second. This was followed by more ill health. He died at Ghent on April 20, 1932

after an operation for a gastric ulcer.

Hans Kmoch's tribute to Colle in the *Wiener Schachzeitung* depicts the difficulties which he overcame in achieving these fine results:

"I knew him for exactly seven years. I made his acquaintance at Baden-Baden 1925. From then on we met at countless tournaments, and my admiration for him increased more and more. During these numerous tourneys I saw, heard and experienced a great deal. When it is a question of struggling for money and fame, for honor and achievement, the best of men often give way and follow the instinct for self-preservation. That is natural and not ugly. But this was never true of Colle: it was impossible for him. For his courtesy, his kindness, his chivalrous unselfishness—these qualities were not acquired, they were innate. In victory and in defeat he remained a cavalier.

"Poor Colle was sick—I never saw him in any other condition. His brilliant spirit and sunny soul were fettered to a feeble, bloodless little body, always trembling with a cold, always bent with pain. Rarely was he able to take any solid nourishment. And to play in this state? Colle played. I never heard him complain; I never heard him use the excuse that he was ill. On the contrary: he would always assure us that he felt quite well; and when he lost, he always explicitly attributed this to bad play. And this while he was usually under a doctor's care!

"Colle was not sentimental. He bore his sufferings as something quite private and of minor importance. He asked for no special consideration, he was always in good humor and a boon companion in company; but at the board he was a relentless fighter guided by a really ideal sense of duty and sportsmanship. All his games were hard-fought, and lengthy, difficult and tiring games were part of his style. Only his stupendous willpower carried him through these games. His spirit ruled his body."

Despite the numerous games of this master already included in the text, it seems most appropriate to present here Colle's most famous game.

When asked by Frank Marshall to select his best game for inclusion in the book "Chess Masterpieces", Colle chose this game.

Edgard Colle

Part One

Lesson Number One

This is an opening that permits a solid development. This opening at the same time allows, in fact it builds for, combinations, and does not spoil our end game chances. It is one of the very few opening systems which can accomplish all of these things, and is the only opening which gives White good chances of not losing against a stronger player! This is the Colle System.

Experience has proven that once you know one opening thoroughly in all its strong and weak points, all other openings become much easier to understand and play correctly. Thus when you once have a good understanding of the Colle, with practical experience in playing it, you will be able to switch to any other opening with success. In chess, as in any other game in which you wish to advance, it is practice that counts. Many will tell you that the Colle System is very tame and does not give White maximum chances. Well, they are right in a way. The Colle is tame . . . only at the same time it does not permit your opponent to spring any opening surprises. The Colle does not let your opponent make the slightest mistake without his getting a serious positional disadvantage. The Colle also gives you excellent end game chances, and this, together with a safe, sound opening, gives you more chances in general. Don't forget that, as an average player, you must also be able to gain an advantage over players of your own ability.

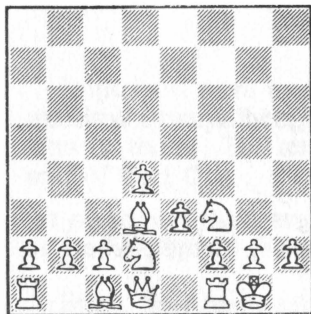

The opening begins as follows:

1 d4	d5 (or Nf6)
2 Nf3	

The idea of the second move, the distinguishing characteristic of the opening, is to prevent something like 2...e5, which, after such a move as 2 c4, would give an inexperienced player of the White pieces a lot of trouble.

The Colle System is based on one simple idea - the development of your pieces. The player of the White pieces aims at a solid development which, unlike any of the open games, does not have to be rushed! The order of moves might be (after d4 and Nf3) e3, Bd3, Nbd2, 0-0, and, only after all this has been achieved, the development of the queen bishop by e4. Play these moves out on your board and note how easily all of the White pieces can come into play. The Colle is the perfect example of the slow and careful execution of a plan.

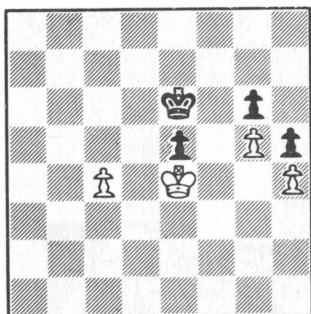

The move e4 is of the greatest importance, and must be played at just the right moment, not a move too soon and not a move too late. If Black manages to prevent e4, without compro-

worries on this score.

It is well known that three pawns are superior to two in the ending. But when our opponent has four on the kingside to our three, as is usually the case after he has exchanged his d-pawn for the pawn which we advance to e4, his majority is not a great advantage. This is so because our king is available to aid in stopping the pawns.

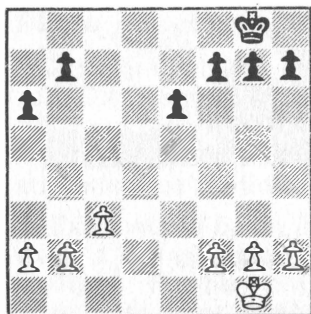

Let us first of all look at the following ending. In the dia-

gram on the left the material is even, three pawns on each side, but Black's majority is on the kingside, and White's extra pawn is on the queenside. The White king is in position to block the passed Black king pawn. What is the result in this position?

No matter whose move it is, White wins. The farthest pawn is the one that decides the game. The Black king will have to go after the free pawn of White and permit the White

king to enter and win the kingside pawns and with them the game.

This is easy but what has this got to do with the Colle System? A lot. Because the second position is what we strive for when we play the Colle. White now plays f4 and permits Black if he wants to to make a passed pawn on e5. The White king goes to e4 and holds the Black pawn in tow and then proceeds to get a passed pawn on the queenside, which should lead to advantage.

Take my advice and study these end-game phases very carefully. In playing the Colle they will become very useful for your move

decisions later on in the game.

To summarize our objectives:

1. We develop our minor pieces on good squares without giving our opponent many chances.
2. We get our king into safety.
3. After gaining a good hold on e4 we push our pawn to that square, threatening to advance it further, where it would be dangerous to Black.

Setting the blindfold record - 34 games -

Edinburgh, Scotland, 1937

Lesson Number Two

Important note to the student: Any move that is underlined, means that it will reappear in the Questions, so pay special attention to them. The answers to the Questions will be found at the end of Part One.

1 d4

d5

1...Nf6 will be considered later.

2 Nf3

Black now has a number of different moves at his disposal, of which only four are worthy of study: 2...Bg4; 2...Bf5; 2...c5; and 2...Nf6.

2...Bg4. This early development of the QB weakens the queenside. White can play against this weakness by playing 3 c4. If now 3...Bxf3, we play 4 exf3, followed eventually by f4 with the better outlook, or 4 gxf3 and eventually e4, or even better e3, Bg2 and 0-0. (Study this position carefully.) Black has without reason given up an active bishop for a less valuable knight. It is especially illogical to give up this bishop when his queenside is weak and soon under attack. The following opening play, which often occurs in my exhibitions of simultaneous play, is a typical example of the trouble Black can get into.

1 d4

d5

6 e3

Be7 (a)

2 Nf3

Bg4

7 cxd

exd (Q1)

3 c4

e6

8 Bb5†

Bd7 (Best)

4 Qb3

b6

9 Nxd7

Nbxd7

5 Ne5

Nf6

10 Bc6,

and White wins a

pawn and with it the game.

(a) If 6...Bd6 7 cxd5 Bxe5 8 dxe5 Nxd5 9 Qa4† wins the bishop.

We are justified in rejecting 2...Bg4 because it weakens Black's queenside without compensation.

2...Bf5. This move is similar to Bg4. It is again a premature development of the QB, and allows White to attack in much the same manner as before. White's reply would be 3 c4. Never hesitate to get away from the Colle System if you can get an advantageous continuation.

Bxb1 would be an illogical continuation for Black. It would mean a loss of time, since the bishop is developed and then exchanged. Furthermore, the bishop is exchanged for a knight. This latter point requires some explanation. The problem of the relative value of the bishop and the knight is as old as the game

itself. The truth is that there is no steadfast rule that can be drawn or applied, but that in practice the bishop tends to be the more active piece and therefore the more valuable. It is true that there are some masters who prefer the knight, usually because their individual styles make knight maneuvers successful. Modern tournament play has shown, however, that most masters prefer and are more successful with the bishop, and I would recommend that you follow their example.

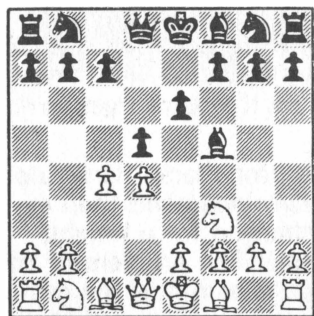

After **3 c4**, the move **3...dxc** is not to be recommended. White can easily regain his pawn (for example, by **Qa4†**), and will obtain a strong hold on the center of the board. Note that he will have two pawns, the e-pawn and d-pawn, in the center, while Black will have only one. **Control of the center is important because it simplifies your major opening task -- the development of your pieces!** Such control gives you more of your own territory, and more of your opponent's territory, in which to operate. The more territory you control, the easier your game becomes.

In this sense, let us consider **3 c4 Nc6**. White would play **4 cxd5**, and if **4...Qxd5**, then **5 Nc3** will drive away the Black queen and allow **e4**, after which White easily dominates the center.

After **1 d4 d5 2 Nf3 Bf5 3 c4 c6**, we have the Slav Defense to the Queen's Gambit Declined. It is comparatively passive in that Black is only supporting his center pawn and is not setting up any new bars to White's development.

White must therefore try to attain a rapid development. Thus: **4 cxd5 cxd5** (Q2) **5 Qb3 Qc8** (Q3) **6 Bf4**, and White has the better developed game. He should continue with **Nc3** and **Rc1**.

The Slav Defense in the form shown above cannot be considered as playable for Black. A better move would be **3...e6**,

when we could have the following position:

4 Qb3	Nc6
5 Qxb7?	Nb4!
6 Na3	Rb8
7 Qxa7	Ra8, and

Black can take the draw by repetition of moves or try for a win with **Rxa3** and **Nc2†**.

In view of this little trap, White plays **5 c5**. Now the threat of

capture at b7 is real. Black must play **5...Rb8**, and after **6 Bf4** White has the better game. He can complete his development quickly by **Nc3**, **e3**, and **Be2** or **Bb5**. The pawn at c5 will remain a thorn in Black's side.

The move **2...Bf5** can therefore be considered premature. We shall, however, see it as a third move when it is somewhat stronger.

This lesson, in addition to investigating possible Black moves against the Colle opening, should have made one fact very clear. **In learning an opening for White, we must know it thoroughly for Black, too!**

Questions -- Lesson Number Two

The questions on Lesson Two are not very difficult, the answers being in most cases quite obvious. However, you should be on your toes, and should see the answers in a matter of seconds!

1. **7...exd** What should White play in answer to **7...Qxd5**?
 8 ----- 9 -----
 10 -----
2. **4...cxd** What is White's best reply to **4...Qxd5**?
3. **5...Qc8** What does Black threaten after, say, **6 e3** or **6 Ne5**?

Lesson Number Three

1 d4	d5
2 Nf3	c5

This is played very often but it is stronger when preceded by **...Nf6**. White again plays to weaken Black's queenside and continues **3 c4**. Should Black now play **3...e6**, we get the Tarrasch Defense to the Queen's Gambit Declined in which White has not yet played **Nc3**. White would continue with **cxd5** and Black gets a weak d-pawn.

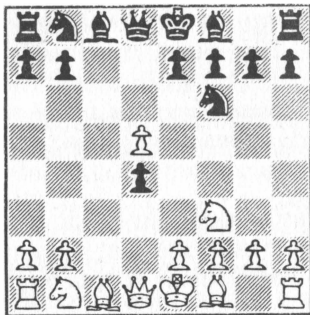

3 c4	<u>cxd</u> (Q1)
4 cxd	Nf6 (Q2)

If here **4...Qa5†**, then White will gain in development through some such line of play as the following:

5 Qd2	<u>Qxd5</u> (Q3)
6 Nc3	Qh5
7 Nxd4	Bd7
8 e4	Nc6
9 f4	

to be followed by **Qf2**.

Position after 4...Nf6

5	Nxd4	Nxd5
6	e4	<u>Nb4</u> (Q4)
7	Be3	N(b8)c6
8	a3	Nxd4
9	axb4	Nc6
10	Qxd8†	Kxd8
11	b5	Nb4
12	Rxa7, and White has won a pawn.	

Many weaker opponents will play 1 d4 d5 2 Nf3 Nc6; apparently under the impression that they are playing a Ruy Lopez. The chief disadvantage of Black's second move is that it leaves the c-pawn backward, thus preventing the normal development of the queen. Let us examine a game played in a blindfold exhibition with 8 others in Kreuzlingen, Switzerland, in October 1937.

White: G. Koltanowski

Black: N. N.

This game illustrates just one method of handling the opening, although there are other lines which are just as good.

1	d4	d5	14	Ba2	Nce7
2	Nf3	Nc6	15	Qd3	Neg6
3	Bf4	e6	16	Nh4	<u>Nxh4</u> (Q5)
4	e3	Bd6	17	Rxh4	Ne7
5	Bg3	Bxg3	18	<u>Rg4</u> (Q6)	<u>Ng6</u> (Q7)
6	hxg3 (a)	Nf6	19	0-0-0	Qe7
7	c4	dxc	20	Nf6†	gxf6
8	Bxc4	0-0	21	Rxg6†	fxg6
9	a3	a6	22	Qxg6†	Kf8
10	Nc3	h6	23	exf	Qf7
11	e4	Re8	24	Qxh6†	Kg8
12	e5 (b)	Nd5	25	<u>Rh1</u> (Q8)	Resigns.
13	Ne4	b5			

(a) Note well: When you have the choice of capturing with either of two pawns, capture towards the center. By doing so you strengthen your own center. This is a general rule, and so, always remember that exceptions are rare but possible.

(b) This closes in the Black QB. Note that I have not castled on the kingside for I have an open h-file. Therefore, I prefer to castle on the queenside and start a kingside attack.

Questions -- Lesson Number Three

1. 3...cxd How should White answer 3...dxc? With what idea?

2. 4...Nf6 Why not 4...Qxd5? : 4 cxd Qxd5 5 -----
3. 5...Qxd5 What should White play after: 5...Qxd2† 6 Bxd2
Nf6 7 Nxd4 Nxd5 8 -----
4. 6...Nb4 What is Black's threat? 6...Nb4 7 -----
8 -----, winning a piece.
5. 16...Nhx4 This move aids the White attack by removing
this knight from the defense of the king. Better
would have been 16 Nh4 -----.
6. 18 Rg4 With what threat?
7. 18...Ng6 With what threat?
8. 25 Rh1!, and Black resigned. Why?

Lesson Number Four

1 d4 d5
2 Nf3

If 2...e6; continue normally with 3 e3. Nine times out of ten you will fall back into the original defense to the Colle. If your opponent should try anything fanciful he will only get an inferior position. There is only one line which we must look into -- the Stonewall Variation:

2 e6
3 e3 f5

White does best by trying to place his pieces in the following manner: c4, Nc3, Bd3, 0-0, Ne5 (or Nd2), f3, and e4. This line will give Black plenty to worry about. Play the moves out on your board, and observe how White is able to obtain his prime objective -- the development of his pieces.

We now come to Black's second move against the Colle.

1 d4 d5
2 Nf3 Nf6
3 e3

Black now has practically the same choices that he had after his second move. For example, he might play 3...Bf5. As before, we would continue 4 c4. The opening of the game I played at Margate, 1936, against Master Conde, illustrates one of the available continuations for White:

1 d4	d5
2 Nf3	Nf6
3 e3	Bf5
4 c4	c6
5 cxd	cxd
6 Nc3	e6
7 Qb3	Qc8
8 Bd2	Be7
9 Rc1	<u>Nc6</u> (Q1)

10	Ne5	<u>0-0</u> (Q2)
11	Na4	Bd6
12	<u>Bb5</u> (Q3)	Bxe5
13	dxe5	<u>Nd7</u> (Q4)
14	Bb4, to be followed by	<u>Bd6</u> (Q5)

* * * * *

1	d4	d5
2	Nf3	Nf6
3	e3	Bg4
4	c4!	

This is even more forceful than in the earlier lines, for the White KB is more active.

* * * * *

1	d4	d5
2	Nf3	Nf6
3	e3	c6

White has a simple task after this passive move. The best play would continue along these lines:

4	Ne5	Nbd7
5	f4	Nxe5
6	fxe5	Ne4
7	Bd3, followed by	0-0, with a good game.

Also very strong is 4 c4. This move is very good to be played whenever Black weakens his queenside in the opening.

* * * * *

The move 3...c5 was for some time considered the best move for Black. White should not answer it with 4 dxc, for Black may then gain quick control of the center and a rapid development of his pieces. Here is an example:

1	d4	d5	10	Bd2	e5
2	Nf3	Nf6	11	Qc3	Be7
3	e3	c5	12	b4	<u>0-0</u> (Q6)
4	dxc	Nc6	13	Rg1	d4!
5	a3	a5	14	<u>Qc4</u> (Q7)	axb4
6	Bb5	Bg4	15	Bxb4	Nd5
7	Bxc6†	bx c6	16	Bd2	Bxc5
8	Qd4	Bxf3	17	Qxc5	Qb2,
9	gxf3	Qb8		and Black wins.	

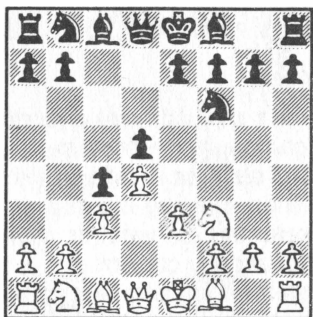

Note that Black wins because of his early superiority in the center, which gains several moves for him and does not give White the opportunity to free his cramped queenside. The theoreticians then tried to prove that after 3...c5, the best line is c3, and after 4...Nc6, we get back into the normal Colle. However, after 4...Nbd7, Black may play his queen to c7, and eventually free himself by the move e5.

The natural question must be answered here. I state that after 1 d4 d5 2 Nf3 Nf6 3 e3 c5 4 c3 Nbd2 Black is threatening Qc7 with an eventual e5. You may wonder why this is threatened when the knight is placed at d7 and yet not threatened when it is at c6. The point is that at d7 this knight just as well prepares for e5 as at c6, while at the same time it relieves the Black bishop of the job of watching his pawn on c5. This bishop is now free to be developed at g7 to assist the move e5. This is Black's strategical plan. As indicated earlier, Black will get the better game if he can play e5 first, and will get a good game even if he plays it later.

The best defense against the Colle, therefore, is that which involves the moves Nbd7, g6, Bg7, and e5. The best play is:

1 d4	d5
2 Nf3	Nf6
3 e3	c5
4 c3	Nbd7

Why is the move 4...c4 not the best for Black? It holds back the White bishop from coming to d3, so he might have difficulties getting to play e4.

After 4...c4 Black relieves the pressure on White's d-pawn and gives White a good chance to get a good game right away. White follows up with 5 b3, putting pressure on the Black c-pawn. If Black takes on b3 then 6 axb, and White has an open rook's file and pawns in the center and will have a far better position. If Black intends to hold on to the pawn on c4 then he **MUST** continue with 5...b5. There

then follows: 6 a4, and now let's look at the possible lines for Black:

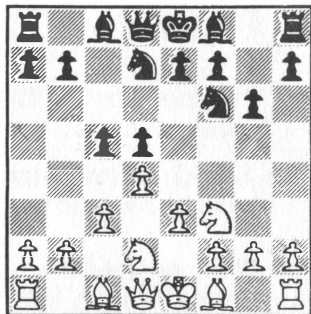

- 6...a6? 7 axb5 and wins.
- 6...Bd7 7 axb5 Bxb5 8 bxc dxc 9 Bxc4 Bxc4 10 Qa4†, etc.
- 6...bxa 7 bxc, etc.
- 6...cxb 7 Bxb5, etc.
- 6...Qa5 (best) 7 Ba3 (7 Bb2 is also playable) 7...e6 8 axb Qxb5 9 Bxf8 Rxf8 10 bxc dxc 11 Ne5 and White has the advantage.
- 6...Qa5 7 Ba3 Ne4 8 Bb4 Qa6 9 Nbd2, and White has the advantage.

Now back to the better continuation 4...Nbd7:

1 d4	d5
2 Nf3	Nf6
3 e3	c5
4 c3	Nbd7
5 Nbd2	g6

I first met this defense in a game with Koblenz, in Madrid, 1936. I continued with 6 Qa4, and after ...Qc7, was able to achieve little in the opening. I was, in fact, lucky to win the game. I burned a great deal of midnight oil in studying the line, and, when Perlmutter played the same defense against me in the Antwerp, 1938, tournament, I continued with:

Position after 5...g6

6 Bd3	Bg7
7 0-0	0-0
8 Qe2	Qc7
9 e4	dx e (a)
10 Nxe4	b6
11 Re1	Re8
12 Neg5!	<u>e6</u> (Q8)
	forced
13 Ne5	Nxe5
14 dx e	Nd5
15 f4, with a very fine game.	(b)

- (a) 9...e5, gives Black good drawing chances.
- (b) Black's 10th move was not his best. He should have played 10...Nxe4 11 Bxe4 Nf6 with a fair game. Note that in spite of this "best" defense, White still obtains a safe, solid game. This is of prime importance when playing against a stronger player. And should your opponent be weaker than you are, then the advantage of a good ending cannot be overestimated. Still, I would recommend that you adopt the ...Nd7, ...g6 defense against the Colle whenever possible, for it does give Black the greatest opportunity to take the initiative. We return to this later.

In our next lesson we will return to the "normal" line in the Colle.

Questions -- Lesson Number Four

1. 9...Nc6 What was White's threat after 9...0-0?
2. 10...0-0 A poor move. Black must drive away the knight at e5. How?
3. 12 Bb5 Black's next move ...Bxe5, is forced. Why?
4. 13...Nd7 If 13...Ne4, then the knight is lost after 14 Bb4, R moves, 15 ----- 16 -----

5. ... followed by Bd6 White threatens to win a pawn. How?
 15 ----- 16 -----
 17 -----
6. 12...0-0 White simplifies easily after 12...axb. How?
7. 14 Qc4 Why not play 14 exd?
 14 exd ----- 15 -----
 16 ----- 17 -----, to Black's advantage.
8. 12...e6 What does White play after, say 12...Bb7?
 13 ----- 14 -----
 15 -----

Lesson Number Five

1 d4	d5
2 Nf3	Nf6
3 e3	e6

Black has now entered the normal line of play. In general it is a bad tactic to copy your opponent's move, but Black will soon vary.

4 Bd3

White sticks to his original plan. He will castle, develop his QN to d2, and then attempt e4.

4 c5

This is Black's best move. Black can, of course, attempt to "follow the leader". Let us see what might happen then:

4 Bd3	Bd6	10 dxe	Nxe5
5 Nbd2	Nbd7	11 Nxe5	Bxe5
6 0-0	0-0	12 Bxh7†	Kxh7
7 e4	dxe	13 Qh5†, and White regains	
8 Nxe4	Nxe4	his bishop and remains a pawn	
9 Bxe4	e5	ahead.	

Black's only chances might lie in an exchange of the heavy pieces and an attempt to draw the resulting bishop ending. That would not be easy.

Another attempt to "follow the leader" might be the following:

1 d4	d5	9 Ne4	Ne5
2 Nf3	Nf6	10 Bg5	Bg4
3 e3	e6	11 Bxf6	Bxf3 (a)
4 Bd3	Bd6	12 Bxd8	Bxd1
5 Nbd2	Nbd7	13 Nxd6	Nxd3
6 0-0	0-0	14 Rfxd1	Rfxd8
7 e4	e5	15 Rxd3	Rxd6
8 exd	exd	16 Rxd4 (b)	

(a) If 11...gxf6 12 Be2, etc.

(b) And the copy-cat can't copy any further! With good play this should be an easy win.

And here is one more line, where Black tries for an early ...e5.

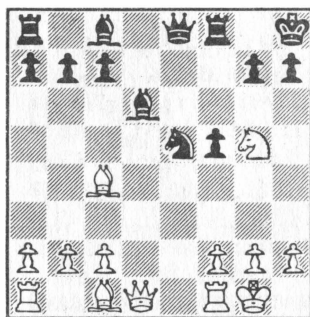

1 d4	d5	8 Nxe4	Nxe4
2 Nf3	Nf6	9 Bxe4	f5
3 e3	e6	10 Bd3	e5 (a)
4 Bd3	Bd6	11 Bc4†	Kh8
5 Nbd2	Nbd7	12 Ng5	Qe8 (b)
6 0-0	0-0	13 dxe	Nxe5 (c)
7 e4	dxe		

(a) Looks like Black has obtained his goal. If 10...e5 is good then he has at least an equal game. But we can prove that White gets the advantage in every variation from now on.

(b) White threatened 13 Nf7† and 13 Nxe7. The text move is the only method of stopping both threats.

(c) If 13...Qxe5, then: 14 Qh5 Nf6 15 Qh4 Qe7 (best) 16 Bd2 h6 17 Rae1 Ne4 18 Qh5, and White wins, as after 18...Nf6 19 Qg6 decides.

Position after 13...Nxe5

(1) 14 Re1 Qg6
15 Rxe5 Bxe5
16 Nf7† Rxf7
17 Qd8† leads to mate.

(2) 14 Re1 h6
15 Bf4 hxg5
16 Bxe5 Bxe5
17 Rxe5 Qg6
18 Qd5 c6
19 Qd4 (d)

(3) 14 Re1 f4
15 Qd4 h6 (e)
16 Bxf4 Rxf4
17 Qxf4 hxg5
18 Qxg5 (f)

(d) With terrific pressure on the open queen and king files, White's game is superior.

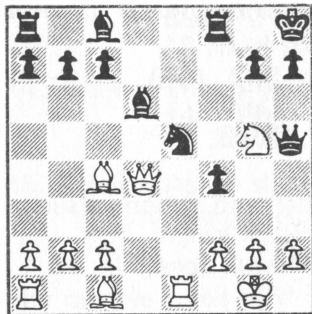

(e) If 15...Qg6 16 Rxe5 Bxe5 17 Qxe5 Rf5 18 Qxf5! Qxf5 19 Nf7†, etc.

(f) Against 19 Qh4† or 19 f4, Black has no answer.

(4) 14 Re1 f4 15 Qd4 Qh5

Now how does White continue in the position of the diagram at the top of the next page?

Position after 15...Qh5

16 Rxe5

Bxe5

17 Qxe5

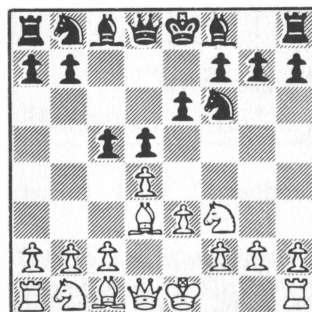

Now Black has two lines of play he can consider:

(a) 17...Qd1† 18 Bf1 Bg4 (threatens 19...Rae8) 19 Be3 Qxa1 20 Bd4 Rf6 (20...Rg8 21 Nf7 mate) 21 Qe7 Rg6 22 Nf7† Kg8 23 Ne5 Rf6 (if 23...Re6 24 Qf7† Kh8 25 Nxg4 Rg6 26 Nh6 and there is no way of stopping 27 Qg8† and 28 Nf7 mate without further loss of material) 24 Nxg4

and wins. After 21 Qe7, possibly Black's best continuation is 21...Be2; forcing 22 Qxe2 f3 (if 22...Rg6 23 Qh5 decides) 23 gxf (the rook is still attacked by the bishops) 23...Rg6 24 f4 and White threatens 25 Qh5 or 25 Qe4 depending upon what Black plays. This line of play should be advantageous for White. Also good for white after 17...Qd1† 18 Bf1 Bg4 (or Bf5), is 19 b3 Rae8 20 Bb2!, etc.

(b) 17...Rf5 18 Qe7 (this stops 18...Qxg5 19 Qe8† or 18...Rxc5 19 Qf8 mate) 18...Qd1† 19 Bf1 Bd7 threatens Bb5) 20 Nf7† Kg8 (20...Rxf7 21 Qxf7 Bb5 22 c4, etc.) 21 Ne5 Bb5 (if 21...Rxe5 22 Qxe5 Re8 23 Qc5 Re1 24 Qc4† Kh8 [24...Be6 25 Qd3 Qxd3 26 cxd Bf5 27 b3 Bxd3 28 Bb2, with advantage] 25 Qd3 is good enough or even 25 Bd2 Qxd2 26 Rxe1 Qxe1 27 Qxf4, etc.) 22 Qe6† Kh8 23 Nd3 (not 23 c4, as Rxe5 wins for Black) 23...Bxd3 24 cxd Rg5 25 Qe2 Qa4 (25...Qxe2 26 Bxe2 Re5 27 Bf1 Re1 28 f3 Rae8 29 Kf2 c5 30 b3 Rd1 31 Be2 Rh1 32 h3 followed by 33 Bb2 or even better 33 Bf1) 26 Qe4 Qxe4 27 dxe Re5 28 f3 with advantage to White.

After 4...c5, White has his choice of two lines of play. The

first is really a change in his plans, and should be looked at first. He will play without the intention of the move e4. Instead, the QB will go to b2, the knight to e5, and the center will be held by f4. Thus:

5 b3	<u>Nc6</u> (Q1)
6 0-0	<u>Bd6</u> (Q2)
7 Bb2	0-0
8 a3 (Q3)	<u>b6</u> (Q4)

The text move is intended to prevent Black's freeing himself, after, say, 8 Nbd2 with some such maneuvers as ...Qe7, ...cxd, and the development of the rook. Play these moves for Black and try to see his plan.

9 Ne5	<u>Bb7</u> (Q5)
10 Nd2	<u>Qe7</u>
11 f4	<u>Rfd8</u>
12 Rf3	

Note how White tries to get his pieces into action in such a way as to allow an attack against the Black king.

12	<u>Ne4</u> (best)
13 <u>Rh3</u> (Q6)	<u>f5</u>
14 <u>Bxe4</u>	<u>dxe4</u> (Q7)
15 <u>Qh5</u>	<u>Bxe5</u> (Q8)

Black's idea with this move is to win the queen for two rooks. In this case he misjudges White's endgame possibilities. You should now be able to answer two questions: What would be White's best move now? What should be his plan of action? We shall consider these questions in the next lesson, but first let us review some information which has a most important bearing on these issues.

The understanding of any endgame requires a knowledge of the relative value of the pieces. We have already discussed the bishop - knight problem, and will now try to put all of the pieces on a scale. Please understand that the values I assign have two limitations; they are general values, and are the values which will be most effective in the play of the average player. Should your game improve to the master level, position-sense rather than pre-determined values will be your guide. However, the scale given below will serve most purposes of over-the-board play:

Pawn	1 point	Knight	3 points	Queen	10 points
Bishop	3 points	Rook	5 points		

These values should be your general guide in endgame play. With their aid, it should be easier to answer the two questions above, before turning to the next lesson.

Questions -- Lesson Number Five

- 5...Nc6 How does White answer 5...cxd 6 exd Bb4+
7 ----
- 6...Bd6 What would be White's reply to ...Nb4, threatening 7...Nxd3?
- 8 a3 What is the purpose of this move?
- 8...b6 This allows 9 Ne5. How could Black have prevented this move?

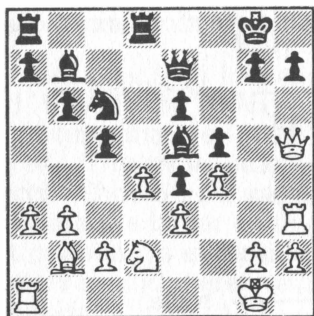

5. 9...Bb7 Why not 9...Bxe5?
6. 13 Rh3 White can apparently win a pawn by Nxe4 and Bxe4. How would Black regain this pawn?
13 Nxe4 dxe4 14 Bxe4 -----
7. 14...dxe4 This is better than fxe4. Why?
14.... fxe4 15 ----- 16 -----
17 ----- 18 -----, with a won position
8. 15...Bxe5 As we shall see, this is not the best. Better would have been 15.....-----.

Lesson Number Six

The relative value of the pieces will become clearer as you gain experience. You will find them true for all but exceptional positions, such as combinations. Remember that these values are most applicable to the endgame, when it is possible for each piece to utilize its full mobility. Thus, a queen is preferable to two rooks in the opening and middle game, where its great mobility permits it to get into action quickly. We will find this to be the case in the game we are studying.

The king is present in all endgames, and it is important to understand that, when active, it is a valuable piece. Despite its invulnerability to capture, it may both defend and attack, and has a fighting value equivalent to that of a knight or a bishop. But then, let us return to our game, which was played between Dr. Max Euwe and Akiba Rubinstein in the Mährisch-Ostrau Tournament of 1923.

Position after 15...Bxe5

16 Qxh7+ Kf7
17 fxe5 (Q1) Rh8

Black would lose quickly after 17...cxd 18 Nxe4! fxe4 19 Qh5+ g6 20 Rf1+ Ke8 21 Qxg6+ Kd7 22 Rh7! Similarly 17...Nxe5 allows White to obtain a won position by 18 Qh5+ Kf8 19 d5! Rxd5 20 Nc4 Nf7 21 Rg3 g5 22 Qg6 followed by Bf6!

18 Qxh8 Rxh8
19 Rxh8 Ba6
20 Nf1 Qd7
21 Rd1! Nxe5?

This is a vital mistake, and surprising for a player of Rubinstein's strength. Akiba Rubinstein was, at the time this game was played, one of the finest chessmasters. His forte was the

endgame, in which his profound knowledge was everywhere recognized and feared. 21...Bxf1 22 Kxf1 cxd! would have given him plenty of counterplay. As it is, White takes the initiative at once, and most of Black's remaining moves are forced.

22 d5! (Q2)	Ng4	24 Rhd8	Bb5
23 dxe†	Qxe6	25 c4	Be8

If 25...Bc6, then Rd1d6 Qe7 (forced) wins through 27 h3 Nf6 28 Bxf6 gxf6 29 Ng3 (Q3).

26 Rd1d5	f4	31 Nf4	Qe7
27 h3	<u>fxe</u> (Q4)	32 Rxcg6	Nf5 (Q7)
28 Ng3 (Q5)	e2	33 Rf6†	Kg8
29 Nxe2	Ne3	34 Rxe8†	Qxe8
30 Rg5 (Q6)	g6	35 Rxf5	e3

36 Re5, and Black resigned, as after 36...Qf8 37 Rg5† leads to his execution.

This game is a good example of the little-played and unusual 5 b3. I would advise the pupil to play this move occasionally, but only after he has become familiar with the main line of the Colle, which we shall now examine in Lesson 7.

Questions -- Lesson Number Six

1. 17 fxe5 Why not 17 Qh5†?
2. 22 d5! Why is this a good move?
3. 29 Ng3 How might White continue after

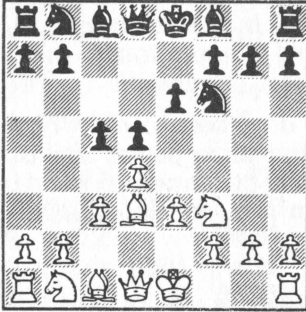

29 Ng3	Kg6	33 -----
30 -----	-----	34 -----
31 -----	-----	35 -----, winning the
32 -----	-----	queen or mating next move.
4. 27...fxe Why not 27...Nxe3?

28 -----	30 -----, and Black is
29 -----	lost.
5. 28 Ng3 Why not 28 hxg4?
6. 30 Rg5 White threatens mate. How?
31 -----, mate.
7. 32...Nf5 Why not 32...Qxd8?
33 ----- 34 -----, mate.

Lesson Number Seven

1 d4	d5
2 Nf3	Nf6
3 e3	e6
4 Bd3	c5
5 c3	

Position after 5 c3

This is the orthodox line in the Colle, in which White tries to achieve a good development, a possible attack, and does not compromise his end game chances. Black may decide to prevent the threatened e4 at once. Should he play 5... cxd then after 6 exd, White's problems of development are over, and his pieces naturally bear down upon the Black kingside. And should Black try to prevent e4 by occupy-

it by ...Ne4, he will soon be driven away by 6 Ne5, 7 0-0, and 8 f3. The fact is that Black has no direct method of holding his e4 square. Indirect methods may therefore be in order.

5 Nbd7

This move serves two purposes. First it prevents White from playing dxc, for then the knight would capture and hold the e4 square securely. Second, it prepares for the eventual Black counter-thrust ...e5.

6 Nbd2	Bd6
7 0-0	0-0
8 Re1	

I also play 8 e4 immediately here, allowing Black to play 8... cxd 9 cxd dxe 10 Nxe4, and the isolated pawn is *not* weak. Remember that you must develop as fully as possible before playing e4. This move usually allows Black to exchange several pieces. Should your remaining pieces be better developed, you will have the better ending. Black, in the present position, cannot develop his queenside. Any attempt on his part to force matters should therefore be unsuccessful. For example:

8 Re1	e5	11 Nxe4	Nxe4
9 e4	cxd	12 Bxe4	exd
10 cxd	dxe	13 Nxd4	

and White's development is more nearly complete.

Since ...Nbd7 does not succeed in either of its aims, Black may simply decide to develop his pieces. Thus:

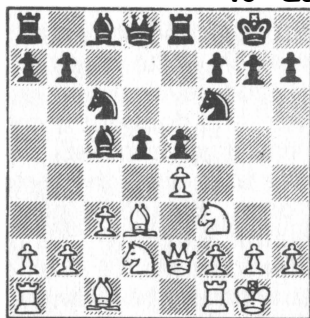

1	d4	d5
2	Nf3	Nf6
3	e3	e6
4	Bd3	c5
5	c3	Nc6

6	Nbd2	Bd6
7	O-O	O-O
8	dx c	Bxc5
9	e4	e5

9...Qc7 as well as 9...dxe are covered below.

10 Qe2

Re8

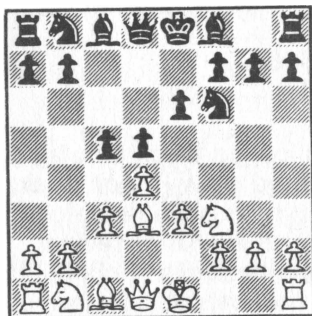

White has achieved his goal playing e4, but Black has good developing chances too. What is White's best continuation here?

White does best to play 11 exd (he has the three pawns against two on the queenside in mind). Black can now continue with:

(a) 11...Nxd5 12 Ne4 Bb6 13 Rd1 Nf4? 14 Bxf4 exf 15 Qc2 is recommended. You intend to play 16 Nd6. If 15...f5, 16 Bc4† wins the Black queen.

(b) 11...Qxd5 12 Ne4 Nxe4 13 Bxe4 Qd8 14 Ng5 h6 (if 14...g6 15 Nxf7, etc.) 15 Nxf7 Qe7 (15...Kxf7 16 Qc4† and 17 Qxc5) 16 Qh5 Rf8 17 Ng5, etc. or even 17 Nxe6, etc.

Position after 5 c3

5		Nc6
6	Nbd2	Bd6
7	O-O	O-O (Q1)
8	dx c	Bxc5
9	e4	Qc7

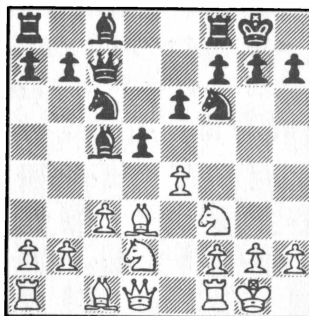

The exchange of queens would give Black the worst of the ending. Let us stop to see why.

9	e4	dxe
10	Nxe4	Nxe4
11	Bxe4	Qxd1
12	Rxd1 (Q2)	

White's pieces are more active, controlling more squares than do those of Black. Bf4 will complete his development, and his queenside pawns will soon advance. Black is still cramped, and will find it hard to get his pieces into play.

Now, let us return to our position after 9...Qc7, as shown in the diagram at the top of the next page.

10 Qe2, preparing the later development of the QR, is the strongest continuation in the diagrammed position. In a game between Colle and Kashdan, played in the Bled tournament, 1931, Colle made the error of allowing Black to develop quite easily by:

10	exd	exd
11	Nb3	Bb6
12	Qc2	Re8
13	Bg5	Ne4
14	Rae1	Bf5
15	Be3	Bg6
16	Nh4?	Nxf2!!
17	Bxf2 (Q3)	Bxf2†
18	Kxf2	Qb6†
19	<u>Kg3</u> (Q4)	Re3†
20	Rxe3	Qxe3†
21	Rf3	Qg5†
22	Kh3	Ne5
23	Rg3	<u>Qh6</u> (Q5)
24	Bf5 (a)	Re8
25	Nd4	Bh5
26	Qf2	g5
27	Bxh7†	Kf8
28	Bf5	gxh4
29	Re3	Re7
30	Re1	Bg4†
31	Bxg4	Nd3
32	Qxh4	Nf4†

33	Kg3	Qxh4†
34	Kxh4	Nxg2†
35	Kg5	Rxe1
36	h4	Ne3
37	Bf3	Nc4
38	Nf5	Rg1†
39	Kf4	Rf1
40	Ne3	Rf2
41	Nd1	Rh2
42	h5	Nxb2
43	Ne3	Nd3†
44	Kg3	Rxa2
45	Nxd5	Rb2
46	h6	Ne5
47	Kf4	Ng6†
48	Kg5	b6
49	Kf5	<u>Ne7†</u> (Q6)

White resigns.

(a) This is not good. Better would have been 24 Bxg6 Nxg6 25 Rxg6 hxg6 26 Kg3, and Black would have to try for a draw by perpetual check. Now, Black wins in a fine manner.

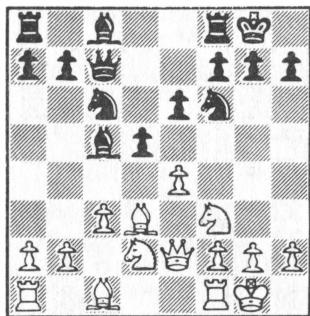

Questions -- Lesson Number Seven

1. 7...0-0 What should White play if 7...e5?
2. 12 Rxd1 Getting his pieces into play. What should White play after 12...f5? 13 ----- 14 -----.
3. 17 Bxf2 What is Black's reply to 17 Kxf2? 17 Kxf2 ----- 18 -----, and wins.
4. 19 Kg3 Why not 19 Nd4? 19 Nd4 ----- 20 ----- 21 ----- and wins.

5. 23...Qh6 What is Black's threat?
6. 49...Ne7† And White resigned. Why?

Lesson Number Eight

Position after 10 Qe2

White has just played 10 Qe2. His idea is to be able to play e5, which would make it difficult for Black to develop his queenside. Black must prevent this move, and continues with:

10 Qe2 Bd6 (Q1)
11 Re1 Ng4

Black counter-attacks in an attempt to decide matters before White can utilize his superior development. The h-pawn is now threatened.

12 h3 Nge5
13 Nxe5 Nxe5
14 exd

14 Bc2 is only a loss of time, while Black cannot now capture the piece without losing a pawn.

14 exd
15 Nf3

White now has a definite advantage, and it would be wise to consider wherein it lies. Both sides appear to have completed the development of their pieces, and yet White's position is solid while Black has one lasting weakness -- his exposed d-pawn. Unless Black is willing to give up his pawn, he will have to utilize his pieces for its defense. These pieces, tied to the defense of the pawn, will not be readily available for the defense of other points which White may attack. Thus, White's plan of action should be, first, the concentration of his pieces upon the Black d-pawn. This might be achieved by Be3, Rad1, Bc2, and Bb3, and perhaps the doubling of his rooks on the d-file. Then, and this will depend upon the manner in which Black arranges his defense of the pawn, White should attack on either the queenside (with his three pawns) or on the kingside (with pieces and pawns).

Having an advantage does not always mean that you are going to win, but it does mean that your game will be easier to play. Merely getting the better position does not make you a better player, but experience in utilizing ideas will. The knowledge to be gained from these lessons will not improve your game unless you seriously apply it -- the more the better. However, DO NOT PLAY "Skittles". One serious game will teach you more than

twenty rapid ones!

We have been studying the orthodox line in the Colle, and before continuing with it, we will look at another idea for Black. White's development seems to be directed towards his opponent's kingside. Why shouldn't Black castle on the queenside? Let us see what might happen.

1 d4	d5	10 Qe2	0-0-0 (a)
2 Nf3	Nf6	11 Ne5	Be8
3 e3	c5	12 Ndf3	Nd7
4 c3	e6	13 Bd2	Nf8
5 Bd3	Nc6	14 c4 (b)	f6
6 Nbd2	cxd	15 cxd	exd
7 exd	Bd6	16 Nxc6	bxc6
8 0-0	Qc7	17 <u>b4</u> (Q2)and White	
9 Re1	Bd7	has a very strong game.	

(a) This was played against me by A. Reynolds in the Birmingham Tournament of 1937. It seems to me as if Black is inviting attack with his last move. Watch!

(b) This move opens the Black queenside for the attack to follow.

Black may play any one of a number of irregular defenses to the Colle. You should be familiar with a few of these. After 1 d4 Nf6 2 Nf3 g6, White does best to continue as he would in the regular Colle. Thus, e3, Bd3, Nbd2, 0-0, Re1, with the eventual e4. White can play more strongly against this defense, and you will be able to do this after you have a good deal of experience with the Colle. The line sketched above should enable you to give a good account of yourself. The best line against the King's Indian is 3 g3, which is the fashion today, and is discussed in Part Three of this book.

If 1 d4 Nf6 2 Nf3 c5, then White can continue with either e3 or d5. In the latter case, the advanced d-pawn will give Black some difficulty.

A still more irregular defense is the Benoni Counter Gambit.

1 d4	c5	2 d5!
------	----	-------

White's advantage will lie in the fact that he can support this advanced pawn by e4 and c4, permanently restricting the development of the Black pieces. A game between Alekhine and Tartakower in the 1926 Dresden Tournament continued:

2	d6	8 g3	f5
3 e4	e5	9 Qg5	0-0
4 Nc3	Be7	10 Qxd8	Rxd8
5 Bd3	Bg5	11 Ng5	g6
6 Nf3	Bxc1	12 <u>f4</u> (Q3), with the	better position.
7 Qxc1	Nh6		

Questions -- Lesson Number Eight

1. Qe2 e5 loses a pawn. How?
 11 ----- 12 -----
 13 ----- 14 -----
2. 17 b4 White has a very strong game. How will he proceed with his attack?
3. 12 f4! What should White play after:
 (a) 12...a6 13 -----
 (b) 12...fxe 13 -----
 (c) 12...exf 13 -----

Lesson Number Nine

We are continuing investigation of the irregular Black defenses in the queen pawn openings.

1 d4	c5	6 Nc3	0-0
2 d5	d6	7 Be2	a6
3 e4	g6	8 <u>a4</u> (Q2)	b6
4 f4	<u>Bg7</u> (Q1)	9 0-0	Bb7
5 Nf3	Nf6	10 Nd2	

White's prospects are better, as he will be able to place this knight in a commanding position at c4 and continue with a kingside attack. Thus, ...c5 is not to be recommended.

1...e6 is occasionally played, but should give White little difficulty.

1 d4	e6	20 c5	Bxg2
2 Nf3	c5	21 cxb	axb
3 c4	<u>cx</u> d (Q3)	22 <u>Qb5</u> (a)	Qd6
4 Nxd4	Nf6	23 Rhg1	Bb7
5 Nc3	Bb4	24 d5	exd
6 Qb3	<u>Bc5</u> (Q4)	25 Nxd5	Bxd5
7 Nf3	<u>b6</u> (Q5)	26 Rxd5	Qc6
8 Bg5	Bb7	27 Rxd7	Rhe8
9 e3	Nc6	28 Qxc6	Nxc6
10 Be2	h6	29 Bf3	g4
11 Bh4	Qe7	30 Bxc6	Rxc6
12 a3	g5	31 Rxf7	Re2
13 Bg3	Nh5	32 <u>Rd1</u> (Q6)	Kc8
14 0-0-0	Nxg3	33 Rc1	Rxc1+
15 hxg3	0-0-0	34 Kxc1	h5
16 Qa4	Kb8	35 Rf5	Re1+
17 Nd4	Bxd4	36 Kd2	Rh1
18 exd4	Rc8	37 Ke3	Rh2
19 Kb1	Na5	38 a4	Kb7

39 b4	h4	45 Rf4	Kxa5
40 gxh	Rxh4	46 Rxg4	Rf6
41 a5	bx a	47 Rd4	Kb5
42 bxa	Rh6	48 f4	Kc5
43 Kf4	Rg6	49 Rd8, and Black	
44 Kg3	Ka6	resigned (b)	

(a) Note how each White move is directed against the same target -- the exposed Black king.

(b) Black's king can never approach the White pawn, and his rook cannot prevent it from advancing. The king and pawn will move onwards to the eighth rank, and Black will finally have to sacrifice his rook for the pawn. He is thus hopelessly lost.

Some Swedish players answer the move 1 d4 with ...e5, which gives White no choice but to capture the pawn. Thus:

1 d4	e5	3 f4	f6
2 dxe	Nc6	4 exf	Nxf6

5 Nc3, followed by Nf3, e3, Bd3, and O-O, and Black has played a gambit which is unsound because it has given him a slight advantage in development without good attacking chances.

The master Bogolyubov sometimes played, after 1 d4, Nc6 White should have no difficulties after:

1 d4	Nc6	4 e4	e5
2 d5	Ne5	5 f5	N6e7
3 f4	Ng6	6 <u>Bg5</u> (Q7)	

The Dutch master Prins once tried an interesting defense against me in one of the Hastings tournaments.

1 d4	d6	7 dxe	<u>Nxe5</u> (Q8)
2 Nf3	Nc6	8 Nxe5	Bxd1
3 e4	Bg4	9 Bxf7†	Ke7
4 Bb5	a6	10 Nc6†	Kxf7
5 Ba4	b5	11 Nxd8†	Rxd8
6 Bb3	e5	12 Kxd1, and White won	

The Dutch Defense, 1...f5, is one of the most plausible of Black's possible replies to 1 d4. In my opinion the move is playable for Black, but not as a first move. Black should first play e6 and then f5.

1 d4 f5

Black's move has two purposes; first, to prevent or make difficult White's eventual e4, and second, to prepare for a possible kingside attack. White may counter Black's plans with one of

three ideas. 1. He may play 2 c4, intending to assume control of the center without playing e4; 2. He may play 2 g3, to place the KB on the long diagonal and prepare e4; 3. He may play e4 at once.

Black's better choice is 1...e6, and 2...f5. Played against the Colle, this form of the Dutch Defense forces White to alter his plans. White's main idea, the completion of his development by e4, now involves a serious drawback -- the opening of the Black f-file. White must therefore plan to control both the e-file and the f-file before he enforces e4. A very careful development is called for, lest Black become dangerous on our kingside. Thus:

1 d4	e6	7 Nc3	c6
2 Nf3	f5	8 b3	Qe8
3 g3	Nf6	9 Qc2	Qh5
4 Bg2	Be7	10 Bf4	Nbd7
5 0-0	0-0	11 Rad1, to be followed	
6 c4	d5 (a)	by Ne5, f3, and e4.	

(a) Black must develop quickly. He does not have time to prepare for e5, which White may in any case prevent.

We have now seen most of the irregular lines Black can adopt against 1 d4 and have found that, although they may be playable for Black, they cause White little difficulty, and usually give him positional advantages. The basis of our study, the Colle, may seem tame, but note that in studying it we have also studied many other important lines as well. Once you know the Colle, and can use it, you should be more than a match in other openings as well. In Part Two of this book we shall examine numerous examples of the play of the Colle System.

Questions -- Lesson Number Nine

1. 4...Bg7 What is the key move of the White attack after 4...Nf6?
2. 8 a4 Why?
3. 3...cxd How should White continue after 3...Nf6?
4 -----
4. 6...Bc5 What does White play after 6...Bxc3? 7 -----
5. 7...b6 How does White answer 7...0-0? 8 -----
6. 32 Rd1 With what threat? 33 -----
7. 6 Bg5 What should White play after 6...f6? 7 -----
8. 7...Nxe5 What if 7...Bxf3 instead?

Answers

Lesson Number Two

- | | | | | | | |
|----|---|-------|------|----|-------|--------|
| 1. | 7 | cx | Qxd5 | 10 | Nxe7 | Qxb5 |
| | 8 | Bb5† | c6 | 11 | Qxb5† | axb5 |
| | 9 | Nxc6 | a6 | 12 | Nc8 | wins. |
| 2. | 4 | | Qxd5 | 5 | Nc3 | (best) |
| 3. | 5 | | Qc8 | 6 | e3? | Qxc1† |

Lesson Number Three

1. White should play **4 d5**, and should try to maintain that advanced pawn by **e4**, **Nc3**, and **Bxc4**.
2. **4 exd Qxd5** **5 Nc3!**, and **6 Qxd4**
3. **8 e4**, with great advantage in development.
4. **6 Nb4** **8 Qxd4 Nc2†**
7 Qxd4! winning a piece.
5. Better would have been **16...Nde7**.
6. White threatens **19 Nf6†**, winning a rook for the knight.
7. Black threatens **19...Nxe5!**
8. **25 Rh1!** Black cannot meet the threat of **Qh8** mate, or if **25...Qd7 26 Qh8† Kf7 27 Qg7** mate.

Lesson Number Four

- | | | | | | |
|----|-----------------------------------|------------------------|----|-------------------|----------|
| 1. | 10 | Nxd5! | | | |
| 2. | 10... | Nd7, and if 11 f4, f6! | | | |
| 3. | White threatened to win a pawn by | | 13 | Nxc6 bxc6 | 14 Rxc6. |
| 4. | 13 | Ne4 | 15 | f3 | Ng5 |
| | 14 | Bb4 R moves | 16 | h4 | |
| 5. | 15 | Bxc6 bxc6 | 16 | Qc3 | |
| 6. | 12 | axb | 14 | Qxa1, followed by | |
| | 13 | axb Rxa1 | | Qa6 | |
| 7. | 14 | exd? axb | 16 | Qxd4 Rxa1 | |
| | 15 | axb exd | 17 | Qxa1 Qxh2, to | |
| | | | | Black's advantage | |
| 8. | 12 | Bb7 | 14 | Qe6† Kf8 | |
| | 13 | Nxf7! Kxf7 | 15 | Ng5 | |
| | | | or | | |
| | 12 | Bb7 | 15 | Qe6† Kf8 | |
| | 13 | Nxf7 Bxf3 | 16 | Bc4 | |
| | 14 | gxf3 Kxf7 | | | |

Lesson Number Five

1. **7 c3**, to be followed by **0-0**.
2. **7 Be2**, to be followed by **a3**, and the bishop can return to **d3**. Black will have lost as much time as White.
3. As White's development continues, he will want to avoid any interruption in his attack by **...Nb4** and the threat of **...Nxd3** or **...Nc2**.
4. **8...Bc7** would prevent White's **Ne5**.
5. If **9...Bxe5**, White will remain with two active bishops bearing down upon the Black kingside.
6. **13 Nxe4 dxe4** **14 Bxe4 Bxe5**
and the pawn will be regained because of the pin of the White queen by the Black rook.
7. **14 fxe4** **17 dxc Bxc5**
15 Qh5 h6 **18 Rg3!**, with a won position.
16 Nxc6 Bxc6
8. **15 h6**

Lesson Number Six

1. **17 Qh5† g6** **18 Qh7† Bg7**
2. **22 d5!** opens the bishop's diagonal, attacks the knight, and frees the second White rook for action.
3. **29 Ng3 Kg6** **32 Rg7† Kh8**
30 Rg8† Kh7 **33 Rd8† Be8**
31 Nxf5 Qe5 (forced) **34 Re7**, winning the queen, or mating next move.
4. **27 Nxe3** **29 Nxe3 fxe3**
28 Re5 Qg6 **30 R8xe8**, and Black is lost.
5. **28 hxg4 e2**
6. **31 Rxg7†**
7. **32 Qxd8** **34 Ne6 mate.**
33 Rg7† Kf8

Lesson Number Seven

1. **7 e5** **8 e4**, and White will be able to use the open king file first.
2. **12 f5** **14 Ne5** wins a pawn.
13 Bxc6 bxc

if

14 Bb7 **16 Bg5** wins the exchange.
15 Nd7

3. 17 Kxf2 Rxe3 18 Rxe3 Qf4†, and wins
4. 19 Nd4 Nxd4 21 any Bxd3 wins
20 cxd4 Qxd4†
5. Black threatens ...Bxd3, followed by ...g5!
6. Black must win the ending. After 50 Nxe7 Kxe7 White's h-pawn will be stopped by the Black's king or rook, while the Black a-pawn will be able to queen without much difficulty, winning the White bishop in the process.

Lesson Number Eight

1. 11 exd Nxd5 13 Qe4† any
12 Bxh7† Kxh7 14 Qxd5, and White is a pawn up.
2. White's attack will consist of Rec1, Rab1, a4, b5 and the further opening up of the Black queenside.
3. (a) 13 a4, preventing the advance of Black's queenside pawns.
(b) 13 Ncxe4, pinning the Black rook to the defense of the d-pawn.
(c) 13 Nb5, threatening Nc7.

Lesson Number Nine

1. White will try to enforce e5. A probable line of play is:
5 Nc3 Nbd7 8 fxe Ng4
6 Nf3 a6 9 e6!
7 e5 dxe
2. 8 a4 is necessary to prevent Black from playing ...b5, with counter-attacking chances on the queenside. It also secures c4 for a knight.
3. 4 d5, and Black's position is similar to that he obtains in the Benoni.
4. 7 Qxc3.
5. 8 Bg5!
6. Rd8†! Rc8 34 Rxc8† Kxc8 35 Rf6 Kc7 36 Rxh6 and if 36...Rxf2 37 Rg6.
7. 7 Be3 (best).
8. 8 Qxf3 Nxe5
9 Qe2

Part Two

Practical Play of the Colle System

As you see, we have treated the second part of the Colle System completely different than the first part. The analysis is all there, but we have added the complete score of the games to illustrate, so that the pupil might get a better picture on how to continue if and when he does obtain some of the objectives he is aiming for. Let us now make a quick resume of the different phases in the Colle System.

The Colle is played as sort of a semi-Stonewall. Slow-motion development with the first objective e4. Achieving this we get an open file for the rook and free the working of the queen bishop. We always have the bishop sacrifice on h7 in mind. We concentrate on getting control of the center with Rad1 and Rfe1. Finally, we have good chances in the ending with our three pawns against two on the queenside.

Assuming that you know all this and even know how to obtain most of your objectives, the chances are very high that your opponent knows these things as well as you and thus he has to find counter-measures and you can bet your bottom dollar that he will come up with things you least expect.

It would be a great and almost impossible task for me to find all the possible ways Black might play against the Colle. Playing serious chess is your best weapon against most lines Black might adopt. Let us speak about a few herewith:

1. If Black plays ...b6 and Bb7, the Queen's Fianchetto. I don't like this too well for Black. See games No. 13, 21, 23, and 24. For ...b6 played later on in the game see numbers 1, 8, 12, and 25.
2. For Black to follow the leader must be bad. A good example is game No. 10.
3. Where Black adopts the double fianchetto, he must be a very strong player, otherwise he really can get into trouble fast. See game 14.
4. For the line in which Black plays ...a5 and ...Nc6 see game No. 15, which is very well annotated and shows White getting a slight edge most of the time.
5. If Black plays an eventual Dutch Defense against you see game No. 22.
6. If Black plays ...Bf5, then we quit playing the Colle and con-

tinue with c4. See game No. 19.

It is very important for you to realize that you play the Colle as long as your opponent stays with you. The moment he switches, you too should switch to the line of continuation that is most favorable to you. This is well explained in Part One. Nowadays you find that most strong players play 2...g6 immediately against any queen pawn opening. Thus the King's Indian Defense can be played against anything White could play. My advice for White is that you start off with 1 d4 Nf6 2 Nf3. Now you intend to play the Colle and thus you have no idea what defense Black is going to adopt. If Black plays 2...g6, your third move is 3 g3 and develop your bishop on g2. The Russians now even play the double fianchetto against the King's Indian Defense. I would suggest that you stay with the line I recommend to you (2...g6 3 g3) until you are more experienced in it, before adopting any other line of play for White. See game 27 and Part Three.

In a modern U. S. Championship, Bisguier played successfully against Lombardy: 1 d4 Nf6 2 Nf3 c5 3 e3 e6 4 c3 d5 5 Nbd2 Nbd7 6 Ne5! (Here's an idea worth while toying with! It shows a sort of semi-Stonewall set-up.) 6...Nxe5 7 dxe Nd7 8 f4 f6 9 Bd3 g6 10 exf Qxf6 11 e4 c4 12 Bc2 Qxf4 13 Nxc4 Qc7 14 Qd4 Rg8 15 exd Bg7 16 Qh4 Nf6 17 d6 Qc6 18 Bg5 b5 19 Bxf6 Qxc4 20 Bd4 (threatens mate on e7) 20...Bf8 21 Qxh7, Black resigns. In giving this modern example, I am only trying to draw your attention to the fact that new continuations are always there. Maybe you will find something new and strong! At least I hope so!

Game 1

Played in the Comtal Chess Club Touranment, July 1934

White: G. Koltanowski -- Black: Catala

1 d4	d5	12 Bc6†	Ke7 (f)
2 Nf3	Nf6	13 b4	Nb7 (g)
3 e3	e6	14 Nd4	Qc7
4 Bd3	c5	15 Qh5	Nd8
5 c3	Nbd7	16 b5	f6 (h)
6 Nbd2	Bd6 (a)	17 Re1 (i)	e5 (j)
7 O-O	b6 (b)	18 Rxe5†!!	Bxe5 (k)
8 e4 (c)	dxe	19 Ba3†	Bd6
9 Nxe4	Nxe4 (d)	20 Re1†	Ne6
10 Bxe4	Rb8	21 Nf5†	Resigns (l)
11 dxc!	Nxc5 (e)		

(a) For the line of play that Black adopts, 6...Be7 was more in line.

- (b) Making loopholes before being castled, always leads to trouble.
- (c) And now one can realize why the last moves of Black had no fundamental ideas behind them. White now threatens e5.
- (d) The bishop should have gone back to e7, but Black prefers his wild policy.
- (e) What can Black do otherwise? If 11...Bxc5, then 12 Bf4 wins.
- (f) Interposing would mean loss of a bishop.
- (g) The knight is rather badly placed here.
- (h) Bb7 was better, although White still has the pull after 17 Bxb7.
- (i) Threatens mate in two.
- (j) And now Black gets a shock!
- (k) If ...fxe5, 19 Bg5† Kf8 and 20 Qe8 mate.
- (l) If ...Kf8 22 Qe8 mate; and on ...Kd8, 22 Bxd6 wins the queen.

Game 2

Played in the Premier Reserves Tournament, Hastings, 1933-34

White: G. Koltanowski -- Black: E. M. Jackson

1 d4	d5	15 Bd2	e5
2 Nf3	Nf6	16 Ng5	h6 (f)
3 e3	c5	17 Qh5	hxc5 (g)
4 c3	Nc6	18 Qh7†	Kf8
5 Nbd2 (a)	Qc7	19 Qh8†	Ke7
6 Bb5 (b)	Bd7	20 Bxc5†	f6 (h)
7 O-O	e6 (c)	21 Qxc5†	Kd8
8 Re1	Bd6	22 Bxf6†	Be7
9 Bd3	O-O	23 dxe	Bxf6
10 e4	cxd	24 Qxf6†	Re7
11 cxd	dxe (d)	25 e6	Qd6 (i)
12 Nxe4	Nxe4	26 Bxc6	Rxc6 (j)
13 Bxe4	Rac8	27 Rad1	Qc7 (k)
14 a3 (e)	Rfe8	28 Qxe7†	Resigns (l)

- (a) dxc is probably correct here, followed by b4. The game thereafter would have the character of the Queen's Gambit Accepted with colors reversed.
- (b) Qa4 is usual. Black should not be allowed to play ...e5.
- (c) ...a6 was better, forcing the exchange of bishop for knight. White would then form a stonewall by 8 Bxc6 Bxc6 9 Ne5 and f4.
- (d) ...Nb4 would have given more play. White now gets a dominating position.
- (e) To stop Black's ...Nb4 and ...Nc2.

- (f) Best; if 16...g6? 17 Nxh7 Kxh7 18 Qh5† Kg7 19 Qh6† Kg8 (not ...Kf6 20 Bg5† Ke6 21 d5 mate) 20 Bxg6 fxg6 21 Qxg6† Kh8 22 Re4, with a strong attack. If 16...f5 17 Bd5†.
- (g) This loses. ...Re7 or ...Nd8 were playable. Black must have thought that his king could escape, and thus hoped to get the advantage by having the open files.
- (h) 20...Ke6 21 d5 mate. Had Black overlooked this at his seventeenth move?
- (i) If 25...Bxe6 26 Rad1† wins.
- (j) If 26...Bxc6 27 Red1! Bd5 28 Qf8† and 29 Rac1†.
- (k) If 27...Qxe6 28 Rxe6 Rxe6 29 Qc3!
- (l) The final coup; 28...Kxe7 29 exd7† Re6 30 d8(Q)† Qxd8 31 Rxe6†, etc.

Game 3

Played in the Mollet Tournament, Spain, July 1935

White: G. Koltanowski -- Black: Cherta

1 d4	Nf6	17 b4	Qe8
2 Nf3	d5	18 Rab1	Ba8
3 e3	e6	19 Rb3! (h)	Bxe5
4 Bd3	Be7	20 dxe5	Qc6
5 Nbd2	Nbd7	21 f3	Nh5 (i)
6 0-0	0-0	22 Be3	g5 (j)
7 Qe2	b6 (a)	23 b5	Qe8 (k)
8 e4	dxe	24 f4! (l)	Nxf4
9 Nxe4	Bb7	25 Bxf4	gxf4
10 Nxf6† (b)	Nxf6	26 Qg4†	Kh8
11 Rd1 (c)	Qd5 (d)	27 Qxf4	f5
12 Bg5	h6	28 Qxh6†	Kg8
13 c4	Qa5	29 Bc2	Rxd1†
14 Bf4	Bd6 (e)	30 Bxd1	f4
15 Ne5 (f)	Rad8	31 Qg5†	Resigns (m)
16 a3!	Qa4 (g)		

- (a) A continuation that has been tried on me many a time since then, but I doubt if it is the best for Black.
- (b) I had thought of continuing with Ng3, but then it struck me that it would be best to get my opponent away from the books. Since then, I know that the text move is the best continuation for White.
- (c) This protects the pawn on d4. If now ...Bxf3 12 Qxf3 Qxd4? 13 Bxh7†, etc.
- (d) This looks very strong, since he threatens to go to h5 with

- his queen, but White is now able to gain a lot of tempi.
- (e) ...Qh5 would not give much now, since he loses the pawn by that move.
 - (f) And now we see that the early sortie of the queen was not only useless, but will still cause anxiety.
 - (g) Black must beware of b4, as then his queen would be shut in after b5.
 - (h) This rook is quickly entering into a kingside attack.
 - (i) 21...Nd7 would have stopped the retreat of the queen. 21...Ne8 would have placed the knight unhappily. Best would have been 21...Nh7, but White would then have continued in a simple but sure manner, i.e. 22 Be3, followed by b5.
 - (j) As g4 was threatened, Black had no other way of saving his knight and the pawn at the same time. White now finished the game in a simple manner.
 - (k) Qb7 was better.
 - (l) This breaks the position.
 - (m) Mate in a few moves cannot be stopped.

Game 4

Played in the Championship of the Barcelona Club d'Escacs
December 3, 1934

White: G. Koltanowski – Black: Cabestany

1 d4	d5	13 Rc1	Qd6? (f)
2 Nf3	Nf6	14 dxe	Qxd2†
3 e3	Nbd7	15 Kxd2	Re8
4 Bd3 (a)	c5 (b)	16 Rhe1	a5 (g)
5 c3	Qc7	17 Rc7	Rb8
6 Nbd2 (c)	e5 (d)	18 Bd5	Kf8
7 e4 (e)	dxe	19 Bxf7! (h)	Re7
8 Nxe4	Nxe4	20 e6	Nf6
9 Bxe4	cx d	21 Rxe7	Kxe7
10 cxd	Bb4†	22 Nd4	Nd5
11 Bd2	Bxd2†	23 Re5	Kd6
12 Qxd2	O-O	24 Rxd5† (i)	Resigns

- (a) 4 Nbd2 would have been better here, so that after 4...c5, the bishop could go to b5, without loss of time.
- (b) Black profits now by White's last move.
- (c) Played without reflection. 6 Qa4 was now necessary, so as to prevent the text move.
- (d) Black now has a good game.

- (e) This has to be played now if White does not want to lose all initiative.
- (f) This loses immediately. Qb8 was the only move that avoided loss of a pawn.
- (g) Black cannot take the pawn, as he would lose the exchange.
- (h) Finishes Black's hopeless game rather quickly. If 19...Kxf7 20 e6† Rxe6 21 Ng5†, etc.
- (i) If now Kxd5, then 25 e7† wins easily.

Game 5

Played in the Tournament of Zurich, November, 1936

White: G. Koltanowski -- Black: Leu

1 d4	d5	14 Re1	Qc7
2 Nf3	Nf6	15 Bf4	Bb4 (c)
3 e3	e6	16 Re3	Rfd8 (d)
4 Bd3	c5	17 Rg3 (e)	Bd6 (f)
5 c3	Nbd7	18 Rc1	Qb8
6 Nbd2	Be7	19 Qe2 (g)	g6
7 0-0	0-0	20 Bg5	Be7 (h)
8 e4 (a)	dxex	21 Bxg6!! (i)	fxg6 (j)
9 Nxe4	cxd	22 Nxg6	Kf7 (k)
10 cxd	Nxe4	23 Ne5†	Kf8 (l)
11 Bxe4	Nf6	24 Bh6†	Ke8
12 Bd3 (b)	b6	25 Rg8†	Resigns (m)
13 Ne5	Bb7		

- (a) Re1 or Qe2 first is better.
- (b) This is better than Bc2.
- (c) Looking for trouble. Bd6 was the move.
- (d) Black has planned to play Nd5, but then White wins through 17 Bxh7† Kxh7 18 Qh5† Kg8 19 Rh3 and mate follows.
- (e) This stops Black from advancing his kingside pawns.
- (f) Not 17...Rxd4 because of 18 Bxh7†, etc.
- (g) To enable Bg5 to follow.
- (h) If 20...Nh5, then 21 Qxh5 gxh5 22 Be7† Kh8 23 Bf6 mate.
- (i) The bishop sacrifice after all!!
- (j) If 21...hxg6 22 Nxg6 gives the Black king no loophole at all.
- (k) If 22...hxg6 23 Qxe6† Kf8 24 Bxf6 Qd6 (forced) 25 Bxe7† Qxe7 26 Qxg6 wins.
- (l) If now 26...Ke8 there follows 27 Bxf6 Bxf6 28 Qh5†.
- (m) If 25...Bf8 26 Rxf8† Ke7 27 Rc7† Kd6 28 Rxf6, etc.

In addition, 25...Nxb8 is not possible because of 28 Qh5 mate.

Game 6

Played in the match, Dublin, 1937

White: G. Koltanowski -- Black: O'Hanlon

1 d4	d5	12 Nb3	Bb6 (i)
2 Nf3	Nf6	13 Bf4 (j)	f6
3 e3	e6	14 Rae1	Ncxe5 (k)
4 Bd3	c5	15 Nxe5	Nxe5
5 c3	Nc6 (a)	16 Bxh7†	Kf8 (l)
6 Nbd2	Bd6 (b)	17 Bg6! (m)	Rd8
7 O-O (c)	O-O	18 Qh5	Ke7 (n)
8 dxc (d)	Bxc5	19 Nd4!	Bd7
9 e4	Qc7 (e)	20 Rxe5!	fxe5
10 Qe2 (f)	Re8 (g)	21 Bxe5	Resigns (o)
11 e5 (h)	Nd7		

- (a) Nbd7 is also good. There then could follow 6 O-O Bd6 7 Nbd2 O-O 8 Re1 (if 8 h3 Qc7! 9 e4 dxe4 10 Nxe4 Nxe4 11 Bxe4 Nf6 followed by g6 and Bg7 or immediately 8 e4 cxd4 9 cxd4 dxe4 10 Nxe4 Nxe4 11 Bxe4 Qb6! with a strong game) 8...e5 9 e4 cxd4 10 cxd4 dxe4 11 Nxe4 Nxe4 12 Bxe4 exd4 13 Qxd4 as in the game Colle - Sir George Thomas, at Carlsbad, 1929.
- (b) Better is to place the bishop on e7. In a game Alekhine - Flohr, Berne 1932, Black played 6...Qc7. There followed 7 O-O Be7 8 Qe2 O-O 9 e4 dxe4 10 Nxe4 cxd4 11 Nxd4 Nxd4 12 cxd4, and White has a good game. If 12...Nd5 13 Qh5 is very strong, and on 12...Qd8 13 Nxf6† Bxf6 14 Qe4. If 12...Nxe4 13 Bxe4 is good enough.
- (c) Not so good here is 7 e4, as there would follow 7...cxd4 8 cxd4 dxe4 9 Nxe4 Nxe4 10 Bxe4 Bb4†, etc. making the game easy for Black, as White has not much left for a possible attack, and the pawn on d4 is weak.
- (d) Now 8 e4 is bad. Just see: 8...cxd4 9 Nxd4 Nxd4 10 cxd4 dxe4 11 Nxe4 Nxe4 12 Bxe4 Bxh2† 13 Kxh2 Qh4†, etc., leaving Black with the initiative.
- (e) In a match game with Domenech, Barcelona, my opponent played here, 9...d4, and soon had a lost game after 10 Nb3. If 9...dxe4 10 Nxe4 Nxe4 11 Bxe4 Qxd1 12 Rxd1, White has more control of the position, and the main threat, b4, followed closely by a4, does not look too good for Black. If 9...e5 10 exd5 Nxd5 (if Qxd5 11 Qe2 Re8 12 Be4! Qd7 13 Ng5) 11 Ne4 Be7 12 Nb3, with a fine position as in the game Colle - Euwe, in their match, 1929.

- (f) This is better than 10 exd5 exd5 11 Nb3 Bb6 with lots of counter chances for his weak pawn on d5, as in the game Colle - Kashdan, Veldes, 1931.
- (g) The theoretical continuation here is 10...Bd6, so as to stop the king's pawn from advancing.
- (h) Nothing can be wrong with a move like that; it gives Black something to worry about.
- (i) Bf8 would have been better, then White would have continued with Nbd4, Bf4 or Bb5.
- (j) Defense and development.
- (k) Loses immediately. ...Rf8 was better.
- (l) If ...Kxh7 17 Qh5† wins the exchange.
- (m) Cuts off all escape for the king.
- (n) Qh8† was threatened.
- (o) Black must lose the queen or be mated by 22 Qh4†, etc. If at 20...Rh8, then 21 Nf5† wins.

Game 7

Played in the Sitges Tournament, 1934
 White: G. Koltanowski -- Black: Cherta

1 d4	Nf6	17 Rae1	Nf6 (l)
2 Nf3	d5	18 Bf2	Qh6 (m)
3 e3	c6 (a)	19 Ng5	Rfe8
4 Bd3 (b)	Bg4 (c)	20 Be3	Bd6
5 Nbd2	Nbd7	21 h3	Bh5
6 c4 (d)	e6 (e)	22 f5!	Ng4 (n)
7 a3 (f)	Be7	23 hxg4 (o)	Bxg4
8 Qc2	B h5	24 Nh3	Qh4
9 b4	Rc8 (g)	25 Bf4	Bxh3
10 Ne5	Bd6	26 Bxd6	Qxd4†
11 f4	Ng4	27 Kh1	Bxf5 (p)
12 Nxc4	Bxc4	28 Bxf5	Qxd6
13 O-O (h)	Qh4 (i)	29 Bxh7†	Kh8
14 e4! (j)	dxe	30 Rf3	g6
15 Nxe4	Be7 (k)	31 Bxc6	fxg6
16 Be3	O-O	32 Qxc6	Resigns (q)

- (a) This idea is from Alekhine.
- (b) First Nbd2 is better here.
- (c) And Black plans already to play ...e5. Had my knight been on d2, I could very well have continued now with 5 c4, and though that would be a loss of tempo for me now, I still would have played that move.

- (d) I must play this now, so as to have some kind of a game if Black should play ...e5.
- (e) ...e5 was surely more forceful. If 6...dxc4, then 7 Nxc4 Qc7 8 0-0 Bxf3 9 Qxf3 e5 10 dxe5 Nxe5 11 Qg3 Nfd7 (best) 12 Bf5! with strong pressure for White. Let us see what could happen after 6...e5 7 cxd5 Nxd5 (not 7...cxd5 because of 8 dxe5 Nxe5 9 Bb5† Bd7 10 Bxd7† Nxd7 and Black has a weak queen's pawn) 8 h3! Bxf3 9 Nxf3 exd4 10 Nxd4 Bb4† 11 Bd2 Ne5 12 Be2 Qa5 13 0-0 Bxd2 14 Nb3! with an equal game. After the text move, Black has a cramped game.
- (f) White must stop Black from playing ...Bb4.
- (g) If ...a5, then 10 b5.
- (h) At last!
- (i) Black should have played ...a5 and 0-0. His queen is only looking for trouble.
- (j) This move is a necessity in the Colle opening, but now it is still more forceful, as the whole game is now dominated by White.
- (k) ...Bb8 was better.
- (l) 17...Bf5 18 Bf2 Qh6 was better.
- (m) If 18...Qh5 19 h3 wins, as after 19...Bxh3 20 gxh3 Qxh3 21 Nxf6† Bxf6 22 Re3, etc.
- (n) Desperation
- (o) Not the best, 23 Nxf7! won immediately, for if then 23... Nxe3, 24 Nxh6†.
- (p) If 27...Bxg2† 28 Qxg2 Qxd6 29 f6 g6 30 Qh3 h5 31 Bxg6, etc.
- (q) The odds are too heavy.

Game 8

Played in the Sitges Tournament

White: G. Koltanowski – Black: Dr. Sunyer

1 d4	d5	12 f4	c5 (e)
2 Nf3	Nf6	13 Rf3	cxd
3 e3	e6	14 exd	Nf8
4 Bd3	b6 (a)	15 Rh3	dx
5 Nbd2	Ba6 (b)	16 bxc	Ba3 (f)
6 c4	Bd6 (c)	17 Bxh7†	Nf6xh7
7 0-0	0-0	18 Rxa3	Bb7
8 b3	c6	19 Rxa7	Rc7
9 Qe2	Re8	20 Ra3 (g)	Qd6
10 Bb2	Nbd7	21 Rg3	f6
11 Ne5 (d)	Rc8	22 Ng4	Kh8

23 Nf2	Ba6	26 Nxf6 !	gxf6
24 Qh5	Rec8	27 Qg4	Resigns
25 Nde4	Qc6 (h)		

- (a) A system like any other, only as the Black pawn is already on d5, the bishop on b7 will have little scope.
- (b) Wishes to exchange bishops, but in reality loses a lot of time.
- (c) If ...dxc, 7 Nxc4, etc.
- (d) This definitely stops the advance of the Black pawn.
- (e) He wishes to break the shackles.
- (f) A far-fetched combination that loses a pawn. It was only good if White happened to take the bishop, but . . .
- (g) "Der Maur hatt sein Plicht getan, der Maur kann gehan . . ."
- (h) In great time pressure. ...Qxf4 was needed although White still remained with great attacking possibilities.

Game 9

Played in the Sitges Tournament, 1934

White: G. Koltanowski -- Black: R. Spielmann

1 d4	d5	8 Qf3	Nxd2 (b)
2 Nf3	Nf6	9 Bxd2	Qh4†
3 e3	e6	10 g3 (c)	Qh3
4 Bd3	b6	11 Bf1	Qf5
5 Nbd2	Bb7	12 Bd3	Qh3
6 Ne5 (a)	Bd6	13 Bf1	Qf5
7 f4	Ne4	14 Bd3	Qh3 (d)

Draw

- (a) Playing for the Stonewall variation.
- (b) ...f5 was not playable because of 9 Qh5†.
- (c) Qc2 was also good here to get into a safe endgame.
- (d) What's that you say? The game has only started? You may have thought that a chess game was a fight to the finish. You are right! Both could find a way of continuing, but then you must take into consideration the state of the scores in tournament play. If I can get a draw easily and a draw serves my purpose, why should I continue "for better or ... worse!"

Game 10

Played in the Sitges Tournament, 1934

White: G. Koltanowski -- Black: Golmayo

1 d4	Nf6	4 Bd3	Nbd7
2 Nf3	d5	5 Nbd2	Bd6
3 e3	e6	6 0-0	e5 (a)

7	e4!	dxe (b)	35	Rd6	Re6
8	Nxe4	Nxe4	36	Rd7	Re1
9	Bxe4	0-0 (c)	37	Rd6	Re6
10	dxe	Nxe5	38	Rd8	Re7
11	Nxe5	Bxe5	39	gxf	gxf
12	Bxh7†	Kxh7	40	Rf8	Rf7
13	Qh5†	Kg8	41	Re8	Rh7
14	Qxe5 (d)	Re8	42	Rf8	Rf7
15	Qg3	c6	43	Rh8	Kg7
16	Be3	Bf5	44	Re8	Kg6
17	c3	Qf6	45	Kg4	Rh7
18	Bd4	Qg6	46	Rf8	Be6†
19	Qxg6 (e)	Bxg6	47	Kg3	Rf7
20	Rfe1	b6	48	Rh8	Kf5
21	b4	Rxe1†	49	h5	Rg7†
22	Rxe1	a5	50	Kf2	Bd5
23	a3	axb	51	Be3	Rf7
24	axb	b5	52	Rh6	Bc4
25	g4	Bd3 (f)	53	Rg6	Bd5
26	Kg2	Bc4	54	Kg3	Rf8
27	Kg3	Ra2	55	Kf2	Rf7
28	Re8†	Kh7	56	Rg4	Rf8
29	Rc8	Bd5	57	h6 (i)	Rf7
30	h4	Ra1	58	Bc5! (j)	Be6
31	Kf4	Re1	59	Bd6	Bc4
32	Rd8	Re2	60	Ke3	Ke6 (k)
33	g5 (g)	Kg6	61	Rh4!	Resigns (l)
34	f3 (h)	f6			

- (a) This is too early, and endangers Black's game. 0-0 is better.
- (b) ...exd, 8 e5 wins a piece.
- (c) And now Black loses a pawn, in a well-known trap of the Colle opening.
- (d) And voila! White is a pawn up. Black's only hope now is to play for a draw, by trying to exchange the heavy battery and remaining with bishops of opposite colors. Even if this should succeed, it would mean constant vigilance and, as in this game, mistakes are easily made in an inferior position. Therefore the loss of a pawn is in no way justified.
- (e) This is to avoid complications.
- (f) If Black can now achieve the exchange of rooks, then he has a certain draw.
- (g) Threatens h5 and h6.
- (h) He wishes to play h5† and Bxg7.

- (i) The pawn advances, slowly but surely.
- (j) And now it becomes noticeable how dangerous the position really is. If White can get his bishop on g7 the game is won.
- (k) This hastens the end.
- (l) Somewhat too early, but he must lose something here all the same. If 61...Rh7 62 Bf8 followed by 63 Bg7 shuts out the rook completely.

Game 11

Played in the Sitges Tournament, 1934

White: G. Koltanowski -- Black: Domenech

1	d4	Nf6	13	Bf4	f5 (b)
2	Nf3	e6	14	Bc2	Qf6
3	e3	c5	15	Rad1	Rfd8 (c)
4	c3	Nc6	16	Bg5	Qf7
5	Bd3	d5 (a)	17	Bxd8	Rxd8
6	Nbd2	Bd6	18	b4	Bb6
7	Qe2	O-O	19	b5	Nb8
8	dxc	Bxc5	20	Ne5	Qf6
9	e4	dxe	21	Bb3	Bc8
10	Nxe4	Nxe4	22	Rxd8†	Bxd8
11	Bxe4	Bd7	23	Qc4 (d)	Qxe5
12	O-O	Rc8	24	Qxc8	Resigns

- (a) And we have a normal Colle again.
- (b) Weakens his kingside.
- (c) Loses the exchange. White's game was, all the same, superior.
- (d) This finishes matters.

Game 12

Played in the Mollet Tournament, 1935

White: G. Koltanowski -- Black: Dr. Vallve

1	d4	Nf6	14	Qe2	b5
2	Nf3	b6	15	e5 (d)	Nd5
3	e3	Bb7	16	Ne4	f5
4	Bd3	c5	17	exf e.p.	Bxf6
5	Nbd2	Nc6	18	Nc5	Qc7 (e)
6	c3	e6	19	g3	Rce8
7	a3 (a)	Qc7	20	Ne5	Bc8 (f)
8	e4	cxd	21	Qe4	g6
9	cxd	Be7	22	Nxg6!	Rf7 (g)
10	O-O	O-O	23	Ne5	Rg7
11	b4! (b)	Rac8	24	Nxe6	Rxe6
12	Bb2	a6	25	Qxd5	Kh8
13	Rc1 (c)	Qf4	26	Bf5	Bxe5

27 dxe5	Rge7 (h)	29 f4	Resigns (i)
28 Bxe6	Rxe6		

- (a) For full annotations on this line, see the next game.
 (b) An original move. I have since played this move very often in in master tournaments with very good success.
 (c) Threatens 14 d5 exd5 15 Bxf6 Bxf6 16 exd5.
 (d) Cutting the Black queen off, and making room for the knight.
 (e) Protecting and making room for his knight.
 (f) If ...d6 21 Nxb7 dxe5 22 Na5 wins.
 (g) If ...hxc6 23 Qxc6† Bg7 24 Qh7† Kf7 25 Bg6† Kf6 26 Ne4†, wins.
 (h) Had the rook on e6 gone away, then e6 wins.
 (i) The threat of f5 is too strong.

Game 13

Played in the Barcelona Tournament, 1935
 This game received the Brilliancy Prize
 White: G. Koltanowski -- Black: B. Reilly

1 d4	Nf6	16 e5	Nd5 (g)
2 Nf3	b6 (a)	17 Bxh7†	Kxh7
3 e3	Bb7	18 Ng5†	Kg6 (h)
4 Bd3	c5	19 Qg4 (i)	f5
5 Nbd2	Nc6	20 Qh4	Nf6 (j)
6 c3	e6	21 exf6	Kxf6 (k)
7 a3	Qc7	22 Rxc6 (l)	Bxc6
8 e4 (b)	cx d	23 d5†	e5
9 cxd	Be7	24 dxc6	Rxc6 (m)
10 0-0	0-0	25 f4	g6 (n)
11 b4 (c)	Rac8	26 Nd4 (o)	exd4
12 Bb2	d6	27 Qh7 (p)	Bg7
13 Rc1	Qb8 (d)	28 Bxd4†	Re5 (q)
14 Qe2	Rfe8	29 Nf3	Resigns (r)
15 Nb3 (e)	Bf8 (f)		

- (a) According to V. Kahn in his book "La Defense Fianchetto Dame" this move is the best against the Colle System, but only if combined with the fianchetto on the kingside as well. Against the line adopted by Reilly in this game, I was particularly happy as I had had to meet similar tactics from S. Flohr in the Antwerp Tournament, 1933. Against Flohr I played the same 11 b4, an original line of my own. I won that game. Reilly and some of my later opponents had studied Kahn's book, but were unacquainted with my way of handling the attack.

- (b) Best, so as to be able to play, if 8...e5, 9 d5, putting Black's queen bishop to sleep.
- (c) The move that was not to be found in "the books"; a very good one in this position. It gives the queen's bishop a good square. ...a5 by Black would be answered by b5 locking up Black's queenside forever.
- (d) The queen had to move as White threatens not only b5, but d5 as well. Just see: 14...exd5 15 Bxf6 Bxf6 16 exd5 winning a piece as the knight is pinned. The square chosen for the queen is an unhappy one, however, putting her quite out of play. Black was haunted by Reti's idea of putting the queen behind the bishop on a8, not a bad idea, had Black more space to work in. Actually d8 was the best square. Who cares to play a piece back to its original square? But that's just what must be done in cases like this! The game's the thing -- nothing else counts beside it.
- (e) White's intention is to play Nfd2 and f4, but after Black's next move all that is not necessary.
- (f) Strange as it may seem, the losing move! ...h6 is essential. The idea is, of course, to get the king's rook into play.
- (g) ...dxe5 would have opened up White's game still more. 16...Nd7 would have been followed by Bxh7† as in the actual game, and on 16...Nh5 could follow 17 Ng5 g6 18 Nxb7 Nf4 (...Kxb7, Qxb5†) 19 Nf6†.
- (h) If 18...Kg8 19 Qh5 wins immediately. On 18...Kh6 follows 19 Qg4 threatening Nxf7† and also 20 Qh4† Kg6 21 Qh7† Kxg5 22 h4†, etc. This last line remains Black's great insecurity.
- (i) The threat is 20 Nxe6† Kh6 21 Qg5† Kh7 22 Qh5† Kg8 23 Ng5.
- (j) Black has to stop Qh7†.
- (k) ...gxf6? 22 Qh7† Kxg5 23 f4† Kg4 24 Qh3 mate.
- (l) 22 d5† Ne5 23 f4 or dxe5† would win as well but White is out to smash Black's defenses at once -- and he succeeds!
- (m) Otherwise b5 follows, leaving Black hopeless.
- (n) If ...Rc7, then 26 fxe5† dxe5 27 Nf3†, etc.
- (o) A nice finishing stroke; the knight must be taken, since if the rook moves away, Nge6† would start a lot of trouble for Black.
- (p) After the brutal move, a quiet, problem-like one; full of danger. Only ...Bg7 can stop the mate which is threatened

in two ways.

- (q) What else is there? After the reply, this rook must be lost and the bishop as well, which spells -- Finis.
- (r) If 29...Ke6, then 30 fxe5 Bxe5 31 Bxe5 dxe5 32 Qxg6† Kd7 (forced) 33 Rd1† Kc7 34 Qf7† Kc8 35 Qe8† Kb7 36 Rd7† Rc7 37 Qxb8† Kxb8 38 Rxc7 Kxc7 39 Nxe5 is more than sufficient.

Game 14

Played at Hastings, 1936-7

White: G. Koltanowski -- Black: Dr. A. Alekhine

1	d4	Nf6	22	Nxd6	Qe6
2	Nf3	b6	23	Qxe6 (n)	Bxe6
3	e3 (a)	Bb7	24	Bc4	Bxc4
4	Nbd2 (b)	c5	25	Nxc4	Nd3
5	c3 (c)	g6 (d)	26	Rc2	Rac8
6	Bd3	Bg7	27	b3	Rf5
7	e4	d6	28	Be3	b5
8	O-O	O-O	29	axb	Rxb5
9	Qe2	cxg6	30	Rd2	Rxb3 (o)
10	cxg6	Nc6	31	Nxa5	Ra3
11	a3 (e)	Nd7	32	Rfd1	Rcc3
12	Nb3	a5	33	Nc4	Rxc4 (p)
13	a4 (f)	Nb4	34	Rxd3	Rxd3
14	Bb5	Nf6 (g)	35	Rxd3 (q)	h6
15	d5	e6 (h)	36	g3	Kh7
16	dxe	Nxe4 (i)	37	h4	h5
17	Ng5 (j)	Bd5 (k)	38	Kg2	Rc7
18	exf1 (l)	Kh8	39	Ra3	Kg8
19	Nxe4	Bxb3	40	Ra7	Rxa7
20	Bg5	Qc7	41	Bxa7	Kf7
21	Rac1 (m)	Qxf7	Draw agreed		

- (a) Against the system adopted by Alekhine (early queen's fianchetto) the Colle System is, in my opinion, definitely superior to the 3 g3 continuation. In this tournament I followed it up with my own particular subsequent breakup of the queen-side by b4 against Eliskases and Tylor; but the turn taken by this game forbade that sort of follow-up.
- (b) If 4 Bd3, then to clear away a piece posted immediately on my e4 I should have to part with a bishop.
- (c) The best move to prepare e4, which is the whole ambition of White's game.
- (d) According to Victor Kahn in his book on the Queen's fianchetto defense, the double fianchetto is the best line against

the Colle; though the most popular is 5...e6 6 Bd3 Nc6 7 a3 Qc7 8 e4 cxd4 9 cxd4 Be7 10 0-0 0-0, but now the move I introduced in my game against Flohr at Antwerp in 1932 (b4) gives White the advantage.

- (e) Not only to stop Nb4 but also in the hope of playing b4, but Alekhine cuts across this plan.
- (f) This move, ceding the square b4, would have been very dangerous before, as the reply Nb4 would have forced my bishop to retire to b1. But now that my opponent has himself played a5, my bishop, instead of retreating, can advance (to b5).
- (g) Trying to force my KN back to d2, where it would cramp the QB terribly.
- (h) There is a specious allure in 15...Nxe4 16 Qxe4 Bxd5 17 Qe3 (forced to protect the knight) Nc2 18 Qd3 Bxf3, so as to answer 19 Qxf3 with Nxa1. But 19 Rb1, and Black has nothing satisfactory.
- (i) If 16...fxe, then 17 Ng5 Qe7 and Black's central pawns are weak.
- (j) A real surprise. If now 17...Nxg5 18 e7 wins a rook. If 17...f5, then 18 f3 wins.
- (k) A desperate attempt to bamboozle me, which partially succeeded!
- (l) The simple line, winning a pawn and leaving an excellent position. But there were at least two completely decisive lines. 18 Ra3, or even better, 18 Nxe4 Bxb3 19 Bg5 (threatening e7) f6 20 Nxf6† Bxf6 21 e7 winning with ease.
- (m) I wished afterwards that I had played the king's rook here instead, because the queen's rook might come into excellent play on the king's side later via a3.
- (n) 23 Qd2 was the move, for White's pieces command all the squares from which the Black rooks could offer any challenge. This ill-considered exchange practically converts a won game into a draw.
- (o) Forced; if the knight moves away, 31 Nd6 wins.
- (p) If 33 Rab3, then 34 Nb2 wins, since if 34...Rxb2 35 Rxb2 Nxb2 36 Rd8† Bf8 37 Bh6! (much better than Bd4†).
- (q) Is this to be won with best play? I doubt it. Black will be able to avoid exchange of either rooks or bishops until the moment is propitious.

Game 15

Played in the Belgian Championship, 1936

This game received the Brilliancy Prize

White: G. Koltanowski -- Black: M. Defosse

1	d4	Nf6	16	Qxf3	Be6
2	Nf3	d5	17	Be3	Rad8
3	e3	e6	18	Bc2	b5 (f)
4	Bd3	c5	19	Bd4	Bc5 (g)
5	c3	Nc6	20	Rad1	b4
6	Nbd2	Bd6	21	Be5 (h)	Bd6 (i)
7	O-O	O-O	22	Bxh7† (j)	Kxh7
8	dxc	Bxc5	23	Qh5†	Kg8
9	e4 (a)	Qc7	24	Bxg7!! (k)	Kxg7 (l)
10	Qe2	Bd6	25	Qg5†	Kh7
11	Re1	Ng4	26	Rd4	Bh2†
12	h3	Nge5	27	Kh1	Qf4
13	Nxe5 (b)	Nxe5	28	Rxf4	Bxf4
14	exd	exd (c)	29	Qxf4	Rg8
15	Nf3 (d)	Nxf3† (e)	30	Re5	Resigns

- (a) Here the books give with unanimity 9...Qc7 as the best move for Black. If instead 9...dxe 10 Nxe4 Nxe4 11 Bxe4 Qxd1 12 Rxd1 and White has an appreciable pull. ...e5 was followed by 10 exd Nxd5 11 Ne4 Be7 12 Ng3 with advantage in the first match game Colle vs Euwe, 1929. In this last variation 10...Qxd5 leads to 11Qe2 Re8 (11...Bg4 12 Ne4) 12 Bc4 Qd7 13Ng5. It seems therefore that 9...Qc7 is best. Now if 10 exd exd 11 Nb3 Bg4 as in the game Colle vs Kashdan, and Black stands well. White plays instead 10 Qe2 as in the text.
- (b) In this position the invariable play has been 13 Bc2. Flohr vs Alekhine, Kecskemet, 1927, continued 13...h6 14 Nxe5 Nxe5 15 Nf3 Nxf3† 16 Qxf3, etc., but I propose instead the line of play which follows.
- (c) Forced since after 14...Nxd3 15 Qxd3 would win a pawn.
- (d) White allows the bishop to go but plans to put the weak d-pawn under pressure.
- (e) If ...Nxd3 16 Qxd3. Black must decide how to protect his d-pawn. If ...Rd8 17 Qxd5 Bh2† 18 Nxh2 Rxd5 19 Re8 mate. If ...Be6 17 Ng5. Therefore, there must come 16... Qc4 17 Rd1 Qxd3 18 Rxd3 Rd8 19 Be3 (not Rxd5 because of Bh2†) Be6 (if here ...Bf5 20 Rd2 Be4 as in the game Koltanowski vs Almeda, Mollet, 1935, then 21 Rad1 and the Black d-pawn is lost by (a) N moves, (b) f3. In this last, if Bxf3 the doubled pawns do not matter) 20 Rad1

(Koltanowski vs Soultanbeieff, Brussels, 1935.)

- (f) With the intention of breaking up the queenside.
- (g) Forced since 20 Qh5 g6 21 Qh6 is threatened.
- (h) The first step of the winning combination.
- (i) If ...Qb6 22 Qg3 followed by Bc7, etc.
- (j) Colle still lives!
- (k) The ideas behind the twentieth and twenty-first moves now become apparent. The rook comes quickly into the game and the Black bishop has been lured to d6.
- (l) Black's last practical alternatives are:
 - (1) ...f6 25 Qh8† Kf7 26 Bxf8 Bxf8 (Rxf8 Qh7† wins) 27 Qh5† Ke7 28 Qh7† Kd6 29 Rxe6† winning the queen.
 - (2) ...f5 25 Qh8† Kf7 26 Qh7! Qd7 27 Rd3 f4 28 Rxd5 Bxd5 29 Bd4 mate.

Game 16

Played in the Paris Tournament, 1929

White: G. Koltanowski -- Black: Dr. S. Tartakower

1	d4	Nf6	26	Rxa4	Be5

14	Qe2	Qc8 (e)	39	Kc4	Rhe2
15	Bd2 (f)	e5 (g)	40	Rg1	g6
16	e4	dx e	41	Raa1	Re4†
17	Bxe4	O-O	42	Kb3	Kb5
18	Bxc6	Qxc6	43	Rae1	Rxe1
19	Qxe5 (h)	Bd6	44	Rxe1	Rd3
20	Qe1	Rfe8	45	Re5†	Kc6
21	Qc1	Rac8	46	Re7 (m)	Rd7
22	c3	bxc	47	Re8	Rd5
23	Bxc3	Re6	48	Re7	Rd7
24	Qd1	h5 (i)	49	Re8, and draws by	
25	Qa4	Qxa4 (j)		repetition of moves.	

- (a) A most peculiar answer, real Tartakowerian.
- (b) Simply 6 e4 and not worrying about the queenside would have been more to the point.
- (c) Not the best.
- (d) Sacrifices a pawn only temporarily.
- (e) The rook's pawn needs protection.
- (f) Here 15 e4 was better.
- (g) Now Black takes the initiative.
- (h) Wins a pawn, but Black has more line control, which makes the position very dangerous for White.
- (i) If ...Rg6 then f3. Of course White cannot take this pawn because of ...Rh6.
- (j) Black decides on the ending.
- (k) 28 Rxc3 would have drawn easily.
- (l) Better than exchanging a rook and allowing White to have a dangerous passed pawn on the queenside.
- (m) To attack is White's best chance of forcing the draw.

Game 17

Played in the Birmingham Tournament, January, 1937

White: G. Koltanowski -- Black: J. Silverman

1 d4	d5	15 Ng5	h6
2 Nf3	Nf6	16 Bf4 (e)	Nc4 (f)
3 e3	e6	17 Bxd6	Nxd6
4 Bd3	c6 (a)	18 Qh5	f4
5 Nbd2	Nbd7	19 Rad1	Bf5
6 O-O	Bd6	20 Ne6	Bxe6
7 Re1	O-O	21 Rxe6	Nf5 (g)
8 e4	dx e	22 Rde1	Rad8
9 Nxe4	Nxe4	23 R1e7	Nd6
10 Bxe4	Qc7	24 Qg6	Qc8
11 c3 (b)	f5 (c)	25 Bc2	Nf5
12 Bc2	e5 (d)	26 Rxf5	Kg8
13 dx e	Nxe5	27 Qh7!	Resigns
14 Bb3†	Kh8		

- (a) Too slow, 4...c5 is much better.
- (b) This is to allow the bishop to go to c2 if Black attacks the bishop with his knight.
- (c) This is bad; 11...Nf6 or even 11...b6 would have been better. After the text move it is a constant struggle for Black, just see.

- (d) All the fault of the eleventh move; ...Nf6 was still the best.
 (e) This is the winning move, as Black cannot play ...f4 (...hxg5? 17 Qh5 mate).
 (f) Otherwise he loses the exchange.
 (g) If ...Rad8? then 22 Qe5 Nb5 23 Rxh6 mate.

Game 18

Played at Hastings, 1935-36

White: G. Koltanowski -- Black: R. Fine

1	d4	Nf6	27	Bb3	Rc7
2	Nf3	e6	28	Rd3	Kg7
3	e3	c5	29	Red1	Re8
4	Bd3	Nc6	30	Rd7 (g)	Re2
5	c3	d5	31	Ba4	Bg5
6	Nbd2	Bd6	32	Rxe7	Rxe7
7	O-O	O-O	33	Rd7	Rxd7
8	Qe2	e5 (a)	34	Bxd7	Kf6
9	dx c (b)	Bxc5	35	c4	Bc1
10	e4	Bg4	36	b4	Ba3
11	exd	Qxd5	37	b5	Ke7
12	Bc4 (c)	Qd7	38	Bc6	Kd6
13	h3	Bh5	39	Bd5	f6
14	Ne4	Nxe4	40	Bg8	h6
15	Qxe4	Qc7	41	Bf7	g5
16	Nh4	Ne7	42	Kg2	Kc5
17	Bg5	Kh8	43	Kg3	Kd4
18	Bxe7	Bxe7	44	Kg4	Kd3
19	Bd3	g6	45	Kf5 (h)	Ke2
20	Nf3	Bd6	46	Kxf6	Bb2
21	Qc4 (e)	Qxc4	47	Bh5	Kd3 (i)
22	Bxc4	Bxf3 (f)	48	Kf5	Kxc4
23	gxf	Rac8	49	Be8	Kd3
24	Bd5	b6	50	Bd7	Ke2
25	Rad1	Be7	51	Ke4	Kxf2
26	Rfe1	Bf6	52	Be6	Drawn

- (a) Black does not wait to free his queen.
 (b) The best reply here as it gives White plenty of counter play.
 (c) Ne4 first seems better.
 (d) Why not simply 13 Nxe5 winning a pawn: if 13...Bxe2 14 Nxd7 Bxf1 (if ...Nxd7 15 Bxe2, or ...Bxc4 15 Nxf6† gxf 16 Nxc4) 15 Nxf6† gxf 16 Bxf1 and White is the exchange down.
 (e) White seeks to exchange queens so as to avoid difficulties.

- (f) This move is forced since White threatens g4. If 22 f5 then 23 Ng5, etc. After the exchange of this bishop, the chances of drawing have increased.
- (g) And now the second rook must be exchanged; the game should be drawn, but Black wishes to continue.
- (h) This ensures a draw in a clear way.
- (i) If 47...e4† 48 Kf5 exf 49 Ke4 draws.

Game 19

Played at Margate, 1936

White: G. Koltanowski -- Black: A. G. Conde

1	d4	d5	22	Qd1 (i)	Ne4
2	Nf3	Nf6	23	f3	Nf6
3	e3	Bf5 (a)	24	Qd4	Rec8
4	c4 (b)	c6	25	b3	Ne8
5	cx d	cx d	26	Qe5	Rab8 (j)
6	Nc3	e6	27	g4	Bg6
7	Qb3	Qc8	28	Rxe6!	Bf7 (k)
8	Bd2	Be7	29	Re7	Qb5
9	Rc1	Nc6 (c)	30	Nc3	Qb4
10	Ne5	O-O (d)	31	Bxb8	Rxb8
11	Na4	Bd6	32	Ne2	Rd8
12	Bb5	Bxe5	33	Kf2	Qa3
13	dx e5	Nd7 (e)	34	Rc2	Kf8
14	Bb4	Re8	35	Rb7	Kg8 (l)
15	Bd6	Qd8 (f)	36	Qe7	Qxe7
16	Bxc6	bxc	37	Rxe7	Ra8
17	O-O (g)	f6	38	Nd4	Kf8
18	exf	Nxf6	39	Rb7	a6
19	Rxc6	Ne4 (h)	40	Rc6	h6
20	Bc7	Qd7	41	Rbb6	Ke7
21	Rfc1	Nd2	42	Rxa6	Resigns

- (a) A line of play against the Colle advocated and practiced by Dr. Max Euwe.
- (b) The sharpest counter play. White's whole plan of campaign is based on the weakness of Black's queenside due to the absence of the bishop. In the normal Queen's Gambit, Black's great trouble is the development of his Queen's bishop. If the problem could be solved in this simple way by its development on the 4th move before ...e6, then the queen's pawn opening would have no terrors for Black. But this isn't so.
- (c) 10 Nxd5 was, of course, threatened. Up to here the game has followed one of the match games between Euwe and Bogljubov. A subsequent game in the last great Euwe-Alekhine match

also opened in this manner.

- (d) The move 10...Nd7 *must* be played here. From now on White's advantage is perceptible.
- (e) If 13...Ne4 then 14 Bb4 followed by f3, etc. wins material. If 13...Ne8 then 14 Bb4 wins the exchange; while after 13...Ng4 14 f4, the knight would subsequently be driven to a bad square by h3.
- (f) 15...a6, in an attempt to get out of the pin, achieves nothing, for 16 Bxc6 bxc 17 Nb6 Qc7 18 Nxd7 Qxd7 19 0-0, and White can double rooks on the file and pick up the c-pawn at his leisure.
- (g) 17 Rxc6 at once might lead to difficulties because of 17...Qa5† and Black can prevent White's castling by Ra6 or Bd3 according to the reply. The c-pawn is dead anyway.
- (h) Apparently forcing 20 Bb4, but White has something better.
- (i) The point of White's twentieth move. If ...Nc4 23 Rxc4, for the d-pawn is pinned.
- (j) Trying to free himself by Rb7, but White does not give him time.
- (k) If 28...Rxc7 29 Rxc7 Qxc7 30 Rxe8† wins. If 29...Nxc7 30 Re7. If 28...Kf8 29 Nc5 Qxc7 30 Rxe8† Bxe8 31 Ne6†.
- (l) Forced because 36 Rcc7 was threatened.

Game 20

Played at Ramsgate, April, 1929

White: G. Koltanowski -- Black: Sir G. Thomas

1	d4	Nf6	19	Rc3	Bxd2
2	Nf3	e6	20	Rxd2	b5
3	e3	d5	21	Re3 (d)	Nb6
4	Bd3	Nbd7	22	c3	Nd5
5	Nbd2	b6	23	Re1	Rfd8
6	Qe2	Bb7	24	Ne5	Rd6
7	0-0	Ne4	25	g3	f6
8	Ba6 (a)	Bxa6	26	Ng4	Rad8
9	Qxa6	Nxd2	27	Ne3	Nb6
10	Bxd2	Bd6	28	Rc2	Kf7
11	Rae1	c5 (b)	29	f4	g5
12	e4 (c)	dxe	30	Kf2	Nd5
13	Rxe4	0-0	31	Nxd5	Rxd5
14	Qd3	Qf6	32	Rce2	R8d6
15	Rd1	Qg6	33	a3	a5
16	Re3	Qxd3	34	Rc1	Rc6
17	Rxd3	c4	35	Ke3	Rd8
18	Re3	Bf4	36	Kd2	Rb8

37 Kc2	Rcb6	41 Ke4	Rbd7
38 Kd2	R8b7	42 Red2	Kd8
39 Rc2	Rd6	43 Rc1	Draw
40 Ke3	Ke7		

- (a) c4 followed by b3 and b2 was more logical.
- (b) This frees Black's queenside.
- (c) Before it's too late.
- (d) Must move away before the Black knight gets to d5.

Game 21

Played in the Antwerp Tournament, March 19, 1932

This game has a double value; first the stalemating of the Black position and then the right moment for the final attack. To me it has a great value because a win against Salo Flohr, considered by many a challenger for the world title, is something to remember. It helped me win the tournament.

White: G. Koltanowski -- Black: Salo Flohr

1 d4	Nf6	20 Rc1	Qb8
2 Nf3	e6	21 Qc2	Ne8 (g)
3 e3	c5 (a)	22 Qd2 (h)	Kg7
4 c3	b6	23 Rc2	h6 (i)
5 Bd3	Bb7	24 Bc1	Rh8
6 Nbd2	Nc6	25 h4	Nf8
7 0-0	Be7	26 Qf4	Qd8
8 Qe2	0-0	27 Rc3 (j)	Bc8
9 a3 (b)	Rc1 (c)	28 Na1 (k)	Bd7
10 e4	cx d	29 Nc2	a4
11 cxd	d6	30 Nb4 (l)	Bxb4 (m)
12 b4 (d)	Nh5	31 axb	Kg8
13 g3	g6	32 Qd2 (n)	Nc7
14 Bb2	d5 (e)	33 Qe2	Be8 (o)
15 e5	Ng7	34 Nh2	Qd7
16 Nb3	a5 (f)	35 Ng4	Nh7 (p)
17 b5	Nb8	36 Bxh6	Qe7 (q)
18 Rfc1	Nd7	37 Qc2	Resigns (r)
19 Rxc1	Qxc1		

- (a) This as second move is considered stronger nowadays.
- (b) To permit e4 without getting the Black knight on b4, which would force the exchange of the strong White bishop.
- (c) ...d5 comes strongly into consideration.
- (d) White already has more breathing space than Black. The bishop on b2 is going to support the center.

- (e) A bit late now, because the White pawn does more damage on e5.
- (f) Black is doing his best to create some weakness in White's position, but slowly loses complete control of the position. The White pawns take commanding positions on the fifth rank. They act as thorns in Black's side.
- (g) If ...Rc8, then White would play 22 Qd2, taking control of the square h6.
- (h) Then the move without gaining time. Black's pieces are stalemated anyhow.
- (i) This stops the threat Bc1 as Black can then play Rh8.
- (j) Hoping to get the rook over to f3.
- (k) This time the plan is to get the knight to g4. White is developing many plans, which is making the defense for Black difficult.
- (l) White changes plans again. There is a loophole on c6.
- (m) There's nothing else Black can do.
- (n) The a-pawn?
- (o) Wishes to play Qd7, getting some counter play.
- (p) Black must stop Nf6†.
- (q) 36...Nxb5 is not good, as there follows 37 Bxb5 Qxb5 38 Qxb5 Bxb5 39 Rc8† winning.
- (r) As after 37...Nxb5 38 Bxb5 Bxb5 39 Rc8+ Be8 40 Qc6, etc.

Game 22

Of the many games I played in international tournaments, I don't think that many can beat this game against Paul Keres. It was played in the Ostend Tournament, 1937, in which Fine, Grob, and Keres all tied for first place. Keres wanted to win this game; it would have insured his first prize alone. Keres should have won - yet fate decided otherwise.

White: G. Koltanowski -- Black: Paul Keres

1 d4	e6	9 Nc2 (e)	b6
2 Nf3 (a)	f5 (b)	10 Bf4	Bb7
3 g3 (c)	Nf6	11 Nb5	Na5
4 Bg2	c5 (d)	12 b3	a6
5 c4	cx d	13 Bc7 (f)	Qc8
6 Nxd4	Be7	14 Bd6	Bx a2 (g)
7 O-O	O-O	15 Kxg2	Nc6
8 Nc3	Nc6	16 Nc3	b5 (h)

17	cxb	Bxd6	51	e3	Ke6
18	Qxd6 (i)	axb	52	h3	Kd5
19	Nb4	Qb7	53	Rd3† (o)	Nd4† (p)
20	Nxc6	Rfc8 (j)	54	Kf2	Ke4
21	f3	Rxc6	55	Nb4	Nc2 (q)
22	Qd2	Rac8	56	Rd2	Nxb4
23	Rfc1	b4	57	axb	Ra3
24	Nd1	Qa6	58	Rb2 (r)	Rxe3
25	Rxc6	Rxc6	59	b5	Ra3
26	Ne3 (k)	Rc3	60	b6	Ra8
27	Nc2	Qb6	61	Rb5	Rb8
28	a3 (l)	Rxb3	62	b7	Kd4
29	Nxb4	Qa7	63	Kf3	d5
30	Qc1	Qd4	64	g4	e4†
31	Rb1	Rc3	65	Kf4	fxg
32	Qb2	Qe3	66	hxg	h4 (s)
33	Nd3	Rc8	67	g5	h3
34	Qe5 (m)	Qa7	68	Kg3	e3 (t)
35	Rb3	h6	69	Rb1	Kc3
36	Rc3	Rb8	70	Kf3	d4
37	Qc7	Ra8	71	Ke2	h2 (u)
38	Qxa7 (n)	Rxa7	72	Rc1†	Kb4
39	Nb4	Kf7	73	Kd3	Rxb7
40	Kf2	Ne8	74	Rh1 (v)	Kc5
41	Ke1	Nd6	75	Rxh2	Kd5
42	Nc2	Ra4	76	g6 (w)	Rb3†
43	Rb3	Ra5	77	Ke2!	Rb2†
44	Ne3	Ke7	78	Kf3 (x)	Rb7
45	Kd2	g5	79	Rg2	Rg7
46	Nc2	h5	80	Rg5†	Kc4
47	Rb4	Nb5	81	Ke2	Kc3
48	Rb3	g4	82	Rc5†	Kb4
49	Ke3	gxf	83	Rd5	Kc4
50	Kxf3	e5	84	Rg5	Draw (y)

- White can turn it into a French Defense with e4.
- This move is better as a second move than as a first, as after 1 d4 f5, White gets a strong attack with 2 e4.
- Fianchettoing the king's bishop is considered the best line of play for White against this form of the Dutch Defense.
- Keres had a great liking for playing on the open c-file.
- Playing on the backward d-pawn.
- A very dangerous continuation. Nd6 could have been tried.
- The only move that saves Black -- and this only because the White king comes under a possible check.

- (h) Nicely played, as it breaks up White's queenside pawns.
- (i) If 18 bxc6 Qxb6† 19 f3 Qxc3 wins a piece.
- (j) All this because the White king is under a pin.
- (k) If 26 Rc1 Rxc1 27 Qxc1 Qxa2 wins.
- (l) Gets more freedom.
- (m) White seeks the exchange of queens.
- (n) At last this, but trouble is still looming ahead.
- (o) Wishes to drive the Black king back.
- (p) What a nasty surprise! If 54 exd e4† wins.
- (q) Attack and counter-attack with each move.
- (r) White decides to give up the king's pawn. He is lost anyway.
- (s) Those passed pawns are eyed with sorrow. But the game must go on. There is too much at stake for some of the other players. On, then, with the battle.
- (t) What is White going to stop first?
- (u) Threatens ...Rxb7.
- (v) Maybe!
- (w) The position merits a close study. Black could have won before probably in more than one way. Now it is more difficult. White's threat is Rh5†.
- (x) It comes off. If ...Rxb2, then 79 g7 and White cannot lose!
- (y) A game full of thrills and chills. But it gives a constantly pleasant memory of one of my hardest tournament battles!

Game 23

Played in exhibition at Columbus, Ohio, October, 1957

White: G. Koltanowski - Black: Tim Anderson

1	d4	Nf6	12	Bb2	Rfd8 (d)
2	Nf3	b6 (a)	13	Rc1 (e)	Qb8
3	e3	Bb7	14	Qe2	Qa8 (f)
4	Nbd2	e6	15	d5 (g)	Nb8
5	Bd3	c5	16	d6 (h)	Bf8
6	c3	Be7	17	e5 (i)	Ne8 (j)
7	O-O	O-O	18	Bxh7† (k)	Kxh7
8	e4	Nc6	19	Ng5†	Kg6
9	a3 (b)	cxd	20	Qg4	f5
10	cxd	Qc7	21	Qh4	Resigns (l)
11	b4 (c)	Rac8			

- (a) Tim is one of the strong players of Columbus and as many good players, feels the Colle System is too tame, and felt

that the Queen's Fianchetto was the strongest line for Black. I differ in this idea.

- (b) And this move, which I introduced in my games with Salo Flohr, Antwerp, 1932, and Brian Reilly, Barcelona, 1934, is the key move against the line adopted by Black. It stops 9...cxd 10 cxd b4 11 Bb1 Ba6, etc.
- (c) White need not fear 11...Nxd4 12 Nxd4 Qc6 13 Nd3 b3, etc. The text move permits the development of the bishop, which strengthens the center position of White.
- (d) Reilly tried 12...d6 here.
- (e) Threatens to win a piece by b5 or d5.
- (f) Placing the queen behind the bishop so as to have the long-range threats is nothing new. Richard Reti played it successfully in a number of master games. In this game it serves no purpose -- and White now takes over completely.
- (g) Hits hard and hurts. If 15...exd 16 exd Nxd5 (...Nb8 17 Qxe7) 17 Qe4 Nf3 18 Bxf6 (...Bxf6 13 Qxh7+ Kf8 20 Rce1, etc.)
- (h) Pawns to the fore! If 16...Bxd6 17 e5 and Black loses a piece.
- (i) One's mouth waters when he can get a position like this one!
- (j) Seven of the eight pieces are on the first rank -- and the loss stares him in the face.
- (k) The Colle rides high today!
- (l) The threat is 21 Qxh7+ Kxg4 23 f4+ Kg4 24 Qh3 mates. If 21...Nf6 22 exf gxf 23 Qh7+, etc, or 21...Bxg2 22 f4 and mate follows. If 21...f4 22 Qh7+ Kxg4 23 h4+ Kg4 24 f3+ Kg3 25 Qg6+ Kxh4 26 Qg4 mate.

Game 24

Played in a simultaneous at Toledo, Ohio, October, 1957

White: G. Koltanowski -- Black: N. N.

1 d4	Nf6	13 Qe2	Red8 (b)
2 Nf3	b6	14 Rac1	Qb8
3 e3	Bb7	15 d5 (c)	exd
4 Nbd2	e6	16 exd	Nxd5
5 Bd3	Be7	17 Qe4	Nf6 (d)
6 O-O	c5	18 Bxf6	Bxf6
7 c3	Nc6	19 Qxh7+	Kf8
8 a3	O-O	20 Rce1	g6
9 e4	cxd	21 Ng5	Bg7 (e)
10 cxd	Qc7	22 Bxg6	fxg
11 b4	Rac8	23 Qxg6	Qf4 (f)
12 Bb2	Bfe8 (a)	24 g3	Ne5 (g)

- 25 Rxe5 Rc6 26 Rf5† Resigns (h)**
- (a) Here's where the game changes to the above game.
 (b) Losing a move now turns out to be very costly.
 (c) Now the upward swing of the pawn is more forceful still.
 The attacked knight has no place to go.
 (d) If 17...g6 18 Qxd5 Nxb4 19 Qd4, etc.
 (e) Cannot take the knight as then Qh8 mates.
 (f) Here Black thought he was out of the woods, only to find
 that White's next move really kills.
 (g) The Black queen has no place to go. If 24...Qf6 25 Nh7†,
 etc. He should have resigned here.
 (h) If 25...Qxf5 26 Qxf5† Kg8 27 Qd5†, etc. Another power-
 ful example of the move a3 for White against the Queen's
 Fianchetto.

Game 25

One of two games played blindfolded in Macon, Georgia
 November, 1957

1 d4	Nf6	25 a3	Na6 (b)
2 Nf3	d5	26 Nc6	Ra8 (c)
3 e3	e6	27 Rd1	Nc5
4 Bd3	Bd6	28 b4	Ne4
5 Nbd2	b6	29 Rd7	a6
6 e4	dx e	30 f3	Nf6
7 Nxe4	Bb7	31 Rb7	b5
8 Nxd6†	Qxd6	32 cxb	axb
9 h3 (a)	Nbd7	33 Ra7	Re8
10 0-0	0-0	34 Ra5	Kf8
11 c3	Nd5	35 Rxb5	Nd5
12 Re1	Nf4	36 Rb8	Rxb8
13 Be4	Bxe4	37 Nxb8	Ke8
14 Rxe4	Nd5	38 Na6	Kd7
15 Ne5	N7f3	39 Kf2	Kc6
16 Re1	Rad8	40 g3	f6
17 Qf3	c5	41 Ke2	Nc3†
18 dxc	Qxc5	42 Kd3	Na4
19 Bg5	h6	43 Kc4	Nb6†
20 Bxf6	Nxf6	44 Kb3	e5
21 Rad1	Rd5	45 Nc5	Kd5
22 Rxd5	Qxd5	46 a4	g6
23 Qxd5	Nxd5	47 a5	Nc8
24 c4	Nb4	48 Nd7	f5

49	Nb6† (d)	Nxb6	55	gxf	gxf
50	axb	Kc6	56	Kd4	Kc6
51	Kc4	g5	57	Kd3	Kd6
52	b7	Kxb7	58	Ke2	Ke5
53	Kd5	e4	59	Kf3	h5
54	fxe	f4	60	h4	Resigns (e)

- (a) If 9...0-0 10 Ng5, etc.
 (b) The endgame technique now displayed is worth going over very carefully.
 (c) 26...Rc8 is not possible as Ne7† follows.
 (d) Finishes the game quickly.
 (e) Black admits that the blindfolded player "saw" what he was doing.

Game 26

Played at Hastings, 1928

White: E. Colle -- Black: V. Buerger

1	d4	Nf6	11	dx c (b)	Bxc5
2	Nf3	d5	12	B g5	Be7
3	e3	e6	13	Qe2 (c)	Qc7
4	Bd3	Be7	14	Rac1	Rd8
5	Nbd2	0-0	15	Ne5	Bd7 (d)
6	0-0	Nbd7	16	Bxh7†	Kxh7
7	e4	dxe	17	Bxf6	Bxf6 (e)
8	Nxe4	Nxe4	18	Qh5†	Kg8
9	Bxe4	Nf6 (a)	19	Qxf7†	Resigns (f)
10	Bd3	c5			

- (a) He might have tried 9...c5 immediately, so as to bring the knight to c5.
 (b) This gives White the three pawns against two majority on the queenside. This may win if it ever gets to the ending.
 (c) Stops 13...b6 14 Bxf6 Bxf6 15 Qe4, etc.
 (d) Leads to trouble! 15...h6 was needed.
 (e) Loses fast. 17...Be8 would hold out.
 (f) White will follow up with Rd3 and Rh3 mate. A good example of the Colle System.

Game 27

Played in a simultaneous exhibition in Oklahoma City

White: G. Koltanowski -- Black: Dale Ruth

1	d4	Nf6	3	g3 (a)	Bg7
2	Nf3	g6	4	Bg2	0-0

5	O-O	d5 (b)	14	Ne5	Na6
6	c4	e6 (c)	15	Nc6	Bxc6 (f)
7	Qb3	b6	16	dx c	Nc7
8	Nc3	dx c	17	Bf4 (g)	Re8
9	Qxc4	Bb7	18	Bxc7	Qxc7
10	Re1	Nfd7 (d)	19	Nb5	Qd8
11	e4	c5 (e)	20	c7	Rxe1†
12	d5	ex d	21	Rxe1	Qd7
13	ex d	Nf3	22	Qe2	Resigns

- (a) If Black adopts the King's Indian Defense early against the Colle set-up, then I prefer to continue with 3 g3 for White. It gives White a good game.
- (b) Continuing with 5...d6 (the real King's Indian Defense) is best.
- (c) Preferable is 6...c6.
- (d) Loses a lot of time. Correct is 10...Ne4.
- (e) Permits White a passed pawn.
- (f) He hasn't much choice.
- (g) Simple and neat.

Game 28

Played by correspondence

White: G. Koltanowski -- Black: Harold Tower

1	d4	d5	11	f4	b6
2	Nf3	Nf6	12	g4	Bb7
3	e3	e6	13	Ng3	h6
4	Bd3	Nbd7	14	c3	Nh7
5	Nbd2	c5	15	g5	Nxe5
6	O-O (a)	cx d (b)	16	fx e	Bf8
7	ex d	Bd6	17	gx h	gx h
8	Re1	O-O	18	Qg4†	Kh8
9	Nf1	Re8	19	Bxh7	Kxh7
10	Ne5	Qc7	20	Nh5	Resigns (c)

- (a) The correct move for White here is 6 c3 but, as my opponent wrote on his move card, "if 6 O-O then cx d", so there was no need to play c3.
- (b) Better is 6 c4.
- (c) There is not much to do against 21 Nf6†.

Game 29

Former world champion Alexander Alekhine played the following game in the Dusseldorf, Germany, tournament in 1908. In it he adopts the "Colle System" -- long before it was called that.

White: A. Alekhine -- Black: H. Koehnlein

1	d4	d5	9	O-O	f5 (a)
2	Nf3	Nf6	10	Bd3	e5
3	e3	e6	11	Bg5 (b)	Qe8
4	Bd3	Nbd7	12	dxe	Nxe5
5	Nbd2	Bd6	13	Re1	Qh5 (c)
6	e4	dxe	14	Nxe5	Qxg5
7	Nxe4	Nxe4	15	Bc4†	Kh8
8	Bxe4	O-O	16	Qxd6!	Resigns (d)

- (a) Better is 9...Nf6 10 Bd3 g6.
 (b) I give 11 Bc4† Kh8 12 Ng5. After 11 Bg5, Black does best to play Be7.
 (c) Leads to trouble. He should have tried 13...Nxf3† 14 Qxf3 Qg6.
 (d) A fine finish! If 16...cxd6 17 Nf7† Rxf7 18 Re8† leads to mate; and after 16...cxd6 17 Nf7† Kg8 18 Nxg5†, etc.

Game 30

Played in Albany, California, May, 1979

White: G. Koltanowski - Black: Dave Pugatch

1	d4	d5	13	Bb5†	Nd7
2	Nf3	Nc6	14	Bg5	Qb6
3	c4	Nf6	15	Rfe1	Nc4 (a)
4	cxd	Nxd5	16	Bf6	Rg8
5	e4	Nb6	17	Rxe7†	Bxe7
6	d5	Na5	18	Re1	Qc5
7	Nc3	Bg4	19	Bxe7	Qxe7 (b)
8	h3	Bxf3	20	Rxe7†	Kxe7
9	Qxf3	c6	21	Bxd7	Kxd7
10	Be2	cxd	22	Qxf7†	Kd6
11	exd	Rc8	23	Qxb7	Resigns (c)
12	O-O	g6			

- (a) If 15...Rxc3 16 Qxc3 or even 16 Bxd7†.
 (b) Best, as otherwise the queen would be lost with a discovered check.
 (c) If 23...Nb6 24 f4 Rfe8 25 Nb5† Kc5 26 Nxa7 Rb8 27 Qc7† Kd4 28 Nc6† Kxd5 29 Nxb8, and it's all over.

Game 31

Two of the strongest players in Bermuda are Paul Yerbury (former University Champion of England) and Lajos Pagony, of Hungary, piano-organ artist, singer and entertainer. Yerbury has not lost a game on the island since arriving there, three years ago. The following game was played in the simultaneous against the Bermuda Olympic team.

White: G. Koltanowski - Black: P. Yerbury

1	d4	d5	27	Bh4	Rg6
2	Nf3	c5	28	Nxf5	Nxf5
3	e3	Nf6	29	Rxf5	Rxf5
4	c3	g6	30	Qxf5	Qxf5
5	Bd3	Bg7	31	Rxf5	Rd6
6	Nbd2	Qc7	32	Bg3	Rd7
7	Ne5	O-O	33	Be5	Bxe5
8	f4	Nc6	34	Rxe5	Kf7
9	O-O	Bf5	35	Kf2	Kf6
10	Bxf5	gxf	36	Re8	Rf7
11	Rf3	e6	37	Rg8	Ke6†
12	Rh3?	Nxe5	38	Ke2	h5
13	fxe	Ng4!	39	Rg5	Rf5
14	Rg3	Kh8	40	Rg7	Rf7
15	h3	Nh6	41	Rxf7	Kxf7
16	Qh5 (a)	f6	42	g3	Kf6
17	Nb3	fxe5	43	Kd2	Kf5
18	Nxc5	Rae8	44	Kc2	b5
19	Rf3	b6	45	Kb3	a5
20	Nb3	e4	46	a4	b4
21	Rf4	e5?	47	cxh	d4
22	dxe	Qxe5	48	Kc2	dxe
23	Bd2	Re7	49	Kd1	h4
24	Raf1	Ref7	50	gxh	Kf4
25	Nd4	Rf6	51	Ke2	Resigns (b)
26	Be1	Kg8			

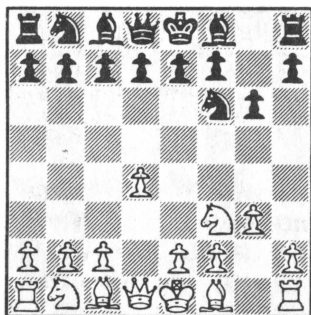

(a) Threatens Rxg7 and Qg5†.

(b) There are too many White pawns!

Part Three

The Colle vs. the King's Indian

It is highly fashionable today to play the King's Indian Defense against the Colle System. Many of the stronger players will adopt this defense against you, and you must therefore be prepared to meet it. After the opening moves **1 d4 Nf6 2 Nf3 g6**, we recommend **3 g3** as White's best try for a small but lasting advantage. The fianchettoed king bishop will exert pressure on the center and on Black's queenside, which will be augmented eventually by **c4** and **Nc3**. This is quite different from the Colle System proper. Here White almost never plays for an early kingside attack, but instead contents himself with a slow build-up and gradually increasing pressure.

The next two moves follow naturally for both sides: **3...Bg7 4 Bg2 0-0 5 0-0**. Now Black must choose between two completely different systems: **5...d5**, the Gruenfeld Defense; and **5...d6**, the King's Indian Defense. A thorough examination of these much-played openings would require hundreds of pages and lose the student in a maze of variations.

For our purpose it will be sufficient to point out the main ideas for both sides, illustrating these with a few carefully selected games.

It should be noted in passing that Black can also play **c5** on his fifth move. However, **6 dxc Na6 7 Nc3** gives White an easy game with slightly superior development.

After **5...d5** White must strike at Black's center if he hopes to gain an advantage. **6 c4** is the most direct way of doing this. Now Black can choose between counterattack with **6...c5**, giving up the center with **6...dxc**, and supporting it with **6...c6** (**6...e6** also supports the center but is less good as it blocks the queen bishop and retards Black's development). After **6...c6** Black's position is slightly cramped but very secure. Direct methods lead to nothing for White (**7 cxd cxd 8 Nc3 Ne4** and Black equalizes). Patient play is required to keep Black from freeing his position, and with this in mind we suggest **7 Nbd2**, which serves the dual purpose of developing the knight and protecting the queen bishop pawn.

With **5...d6** Black avoids symmetry and prepares either a pawn

beachhead in the center or counterplay with his pieces. This move generally leads to a more complicated and dangerous type of game than 5...d5, in which both sides will have more opportunity to go astray. Again White's most promising plan is to increase his pressure on the central squares with 6 c4, and now Black has two good replies: 6...Nbd7 and 6...Nc6. 6...c5 is also playable, but White has a slight edge after 7 dxc dxc 8 Ne5, followed (after 8...Qc7 or 8...Nfd7) by 9 Nd3.

After 6...Nc6 7 Nc3 Black again has three choices. With 7...Bg4 he can challenge White's *control* of the central squares. With 7...e5 he can dispute White's *occupation* of the central squares. And with 7...a6 he postpones a decision, preparing queenside counterplay without immediately committing himself in the center. He can also play 7...Bf5, but this move, though tricky, is not very solid. White gets the advantage after 8 b3 Ne4 9 Bb2 Nxc3 (or 9...Qd7 10 Rc1 Nb4 11 Nxe4 Bxe4 12 Qd2 a5 13 a3 Nc6 14 d5 Bxf3 15 exf, Donner-Spassky, Gothenburg 1955) 10 Bxc3 Be4 11 Rc1 d5 12 e3 a5 13 Qe2 e6 14 Rfd1 a4 15 Bf1 axb 16 axb Qe7 17 Ne1 (Najdorf - Spassky, Gothenburg 1955).

Careful study of the games which follow will make these ideas clearer. Bear in mind that White cannot expect a quick win unless his opponent plays weakly. Against careful defense all he can hope for is a slight initiative or a slightly freer position. Small advantages of this type are the hardest to preserve, and the ability to make the most of them is one of the things that distinguish the master from the amateur.

Important Note: Many roads lead to Rome. The games which follow illustrate the positions we have been discussing, but the opening moves vary in each case. We recommend the sequence given in the introduction, but the games have been given in their original form so that the reader will be aware of the many possibilities of transposition.

Played at Felixstowe, 1949

White: W. A. Fairhurst - Black: H. G. Rhodes

1 d4	Nf6	9 d5	e6
2 c4	g6	10 Bg5	f6 (c)
3 g3	Bg7	11 Be3	Na6
4 Bg2	d5	12 Nc3	exd
5 cxd5	Nxd5	13 exd	Re8 (d)
6 Nf3	0-0	14 Nd2	f5 (e)
7 0-0	c5 (a)	15 Qb3	Kh8
8 e4	Nb6 (b)	16 Rfd1	Bd7

17 a4	Qb8	22 Nb5	Qb7 (g)
18 a5	Nc8	23 d6	Re4 (h)
19 Nc4 (f)	b5	24 Bxe4	fxe4
20 axb e.p.	axb	25 Ne5	h6
21 Bf4	Qa7	26 Qf7	Resigns

- (a) 7...c6 and 7...Nb6 are playable but passive.
 (b) 8...Nf6 is a fair alternative, but White has the edge after 9 e5 Nd5 10 Qe2.
 (c) 10...Qd7 is a better try.
 (d) Or 13...Nc4 14 Bc1 Re8 15 b3 Nd6 16 Bf4 with some advantage for White (Fairhurst - Flohr, Great Britain vs. U.S.S.R., 1947).
 (e) To keep the knight off e4, but now the Black position is full of holes.
 (f) Stopping 19...Nd6 and leaving Black without a good move.
 (g) No better is 22...Bxb5 23 Qxb5 Rd8 24 d6.
 (h) Or 23...Bc6 24 d7, winning.

Played in the 1957 Hungary-Estonia team match

White: Gideon Barcza -- Black: Paul Keres

1 Nf3	d5	22 Qe2	Qf5
2 g3	g6	23 Nc5	Ra7
3 Bg2	Bg7	24 e4 (g)	Qh3
4 d4	Nf6	25 Ncd3	g5
5 0-0	0-0	26 f4	Qc8
6 c4	dxc (a)	27 d5	e6
7 Na3	Nc6 (b)	28 fxg5	hxg5
8 Nxc4	Be6	29 Rf1	exd
9 b3	a5	30 exd	Qh3
10 Bb2	Bd5	31 Nxf7	Nxf7
11 Rc1	Qc8 (c)	32 Rxf7	Kxf7
12 e3	Rd8	33 Rf1†	Kg8
13 a3 (d)	Qe6	34 Bxg7	Qd7 (h)
14 Qc2	h6	35 B f6 (i)	Qe8
15 Rfe1 (e)	Ne4	36 Qg4	Rxd5
16 Red1 (f)	Nd6	37 Ne5	Rxe5
17 Ne1	a4	38 Bxe5	Qxe5
18 Bxd5	Qxd5	39 Qc8†	Kh7
19 b4	Na7	40 Rf7†	Kg6
20 Ne5	Nab5	41 Qg8†	Resigns (j)
21 N1d3	Qe4		

- (a) 6...c6 doesn't suit Keres' style.
 (b) Best is probably 7...Na6 8 Nxc4 c5, but White retains a

slight edge in development, as he does against other moves.

- (c) If 11...a4 12 bxa is good for White. But 11...Ne4 followed by Nd6 is worth a try.
- (d) A good move, anticipating Black's a5-a4-a3.
- (e) White is playing for e4, which would give him a big advantage.
- (f) Now the idea is Ne1 followed by f3 and e4.
- (g) At last!
- (h) If 34...Kxg7 35 Qe7† is deadly.
- (i) Now 36 Qh5 is threatened.
- (j) Mate follows: 41...Kh5 42 Qh7† Kg4 43 h3† Kxg3 44 Qd3† Kh4 45 Rh7 mate.

Played in Hungary, 1963

White: Istvan Bilek -- Black: Miroslav Filip

1 d4	Nf6	15 Qe1	e6
2 Nf3	g6	16 e4 (e)	dx e
3 g3	d5	17 Qxe4	Nd6
4 Bg2	Bg7	18 Qe2	Nf5
5 0-0	0-0	19 Nc5	Qb6 (f)
6 c4	c6	20 Rfe1	Re8
7 Nbd2	Ne4 (a)	21 Qc4	Nd6
8 cxd5 (b)	cx d5	22 Qa2	Nf7
9 Ne5	Nxd2	23 Bd5	Nd8
10 Bxd2	Nd7	24 Re3	Qd6
11 Bc3	Nb6 (c)	25 Rae1	Kf7
12 a4	a5	26 Ne4	Qd7
13 Qd2	f6 (d)	27 Bc4	Resigns (g)
14 Nd3	Nc4		

- (a) A little too ambitious. Black does better to accept a cramped but defensible position with 7...Nbd7, or else try 7...Bf5, when 8 Nh4 gives White a good game.
- (b) 8 Qb3 is also good.
- (c) After 11...Nxe5 12 dx e White's bishops rake the board. If 11...Nf6 12 Qb3 is strong, followed by doubling rooks on the queen bishop file.
- (d) 13...Nc4 14 Nxc4 dxc leaves White in complete control of the center.
- (e) An excellent move. White's control of the center will more than compensate for the isolated pawn.
- (f) If 18...Nxd4 19 Qc4. Black's backward pawn proves much weaker than White's isolated one.

- (g) Black is hopeless against the threatened d5. For example, 27...Qc7 28 d5 exd 29 Bxd5† Be6 (or 29...Kf8 30 Ng5 winning) 30 Nxf6 Bxf6 31 Bxe6†, when White is a pawn up in an overwhelming position.

Played in the Prague Zonal Tournament, 1954

White: Fridrik Olafsson -- Black: Victor Ciocaltea

1 d4	Nf6	18 a3	Qa5
2 c4	g6	19 Nb1	Bd7
3 g3	Bg7	20 Nf3	f5
4 Bg2	0-0	21 e5	dx e
5 Nc3	d6	22 Nxe5	Bxe5
6 Nf3	Nbd7 (a)	23 fxe	Ne4
7 0-0	e5	24 Bd4	c5
8 e4 (b)	c6 (c)	25 Bc3	Qa6
9 h3	exd (d)	26 Rxe4 (g)	fxe4
10 Nxd4	Nc5	27 Nd2	Bf5
11 Be3	Re8	28 g4	Rad8 (h)
12 Qc2	a5	29 gxf5	gxf5
13 Rad1	Nfd7	30 Nxe4	fxe4
14 Rfe1	a4 (e)	31 e6	Rd4 (i)
15 f4 (f)	Qa5	32 Rxd4	cx d4
16 Bf2	Nb6	33 Qg2†	Kf8
17 Bf1	Qb4	34 Bb4†	Resigns (j)

(a) This is the old main line, not quite as popular now as 6...Nc6.

(b) Also good is 8 Qc2 followed by 9 Rd1.

(c) 8...exd usually transposes into the text.

(d) Here Black has several alternatives, but White should retain a small space advantage with best play. For example: if 9...Qb6 10 Re1. Or 9...Qa5 10 Re1. Or 9...a6 10 Be3 b5 11 dx e cxd6 12 Qd6.

(e) This position has appeared many times in tournament play. White's problem is how to make use of his superior development.

(f) The most aggressive of White's several choices.

(g) Eliminating Black's only well-posted piece.

(h) A sad choice, but 28...Be6 29 Nxe4 B or Nxc4 30 Nf6† is no better for Black.

(i) A vain attempt to chain the bishop's fury.

(j) There follows after 34...Re7 35 Qg5 Nc8 36 Qf6†, etc.

Played in the Candidates' Tournament Zurich, 1953

White: Miguel Najdorf -- Black: Tigran Petrosian

1 d4	Nf6	18 Rad1	Ned8 (c)
2 c4	d6	19 Be1	Kh8
3 Nf3	g6	20 Na4	Qc8
4 g3	Bg7	21 Bc3	Bxc3
5 Bg2	O-O	22 Nxc3	Qf5 (d)
6 O-O	Nc6	23 Qxf5	gxf5
7 Nc3	Bg4	24 Rd5	Ne6
8 h3	Bxf3	25 Rxf5	Nb4
9 Bxf3	Nd7	26 Rh5	Ng7
10 Bg2	Nxd4 (a)	27 Rh4	Nf5
11 Bxb7	Rb8	28 Rf4	e6
12 Bg2	c5 (b)	29 Rd1	Rb6
13 e3	Ne6	30 Na4	Rbb8
14 Qc2	a5	31 Be4	Ng7
15 Bd2	Ne5	32 Rxd6	Nxa2
16 b3	Qd7	33 Nxc5	Resigns
17 Kh2	Nc6		

(a) If 10...Bxd4 11 Bxc6. Or 10...e5 11 dxe Ndx5 12 Qa4.

(b) In a later round against the same opponent, Geller improved with 12...Rb4. However, White still had the edge after 13 e3 Ne6 14 Qe2.

(c) Black is reduced to planless maneuvering.

(d) White threatens to get an attacking position with Qe4-h4 followed by f4-f5, but Black's cure is worse than the disease.

Played in the Candidates' Tournament, Curacao, 1962

White: Victor Korchnoi -- Black: Robert Fischer

1 d4	Nf6	17 Nd2	Qb6
2 c4	g6	18 Bb2	f5
3 g3	Bg7	19 Ra3	Bh6
4 Bg2	O-O	20 e3	Rac8
5 Nc3	d6	21 axb	axb
6 Nf3	Nc6	22 Qa2	Bg7
7 O-O	e5	23 Ra1	e4
8 d5	Ne7	24 Bf1	Nd8
9 c5 (a)	Nd7 (b)	25 Ra6	Qb8
10 cxd	cxg7	26 Ra7	Rc7
11 a4	Nc5	27 Rxc7	Qxc7
12 Nd2	b6	28 Nxb5 (c)	Bxb5
13 b4	Nb7	29 Bxb5	Nf7
14 Qb3	Bd7	30 Bxg7	Kxg7
15 Ba3	a6	31 Bc6	Nxc6
16 Nc4	b5	32 Rc1 (d)	Qa7 (e)

33 Qxa7	Nxa7	39 Rb6	Kg5
34 Rc7	Nb5	40 Ra6	Nxd5
35 Rb7	Nc3	41 b6	Nb4
36 Nc4	Kf6	42 Ra4	Rxd6
37 b5	Ne5	43 Rxb4	Rd1†
38 Nxd6	Rd8	44 Kg2	Nf3 (f)

- (a) Sharpest. 9 Ne4 merely gives Black something to bite on: 9...Ne8 10 b4 h6 11 Nd2 f5.
- (b) 9...Ne8 still offers better chances of equalizing. 9...dxc works out badly after 10 Nxe5 Nfxd5 11 Nxd5 Nxd5 12 Nxf7, or 11...Bxe5 12 Bg5 f6 13 Bxf6.
- (c) Control of the open file has led to gain of material. White has a big edge.
- (d) A blunder. 32 Qc4 is the move.
- (e) Winning a piece.
- (f) Mate is unavoidable, so White resigns.

Played in the 1957 Yugoslav Championship

White: Svetozar Gligoric -- Black: Rajko Bogdanovich

1 c4	g6	20 Raf1	Qf8
2 Nc3	Bg7	21 Ne4	Nc5
3 g3	d6	22 Qd2	Nxe4
4 d4	Nf6	23 Bxe4	Bxf5
5 Bg2	O-O	24 Bxf5	Qd6
6 Nf3	Nc6	25 Be4	Rxf2
7 O-O	a6	26 Qxf2	Rf8
8 Qd3 (a)	Bf5	27 Qh4	Ne2†
9 e4	Bg4	28 Kg2	h6
10 Be3	Nd7	29 c5	Qd8
11 Nh4	e5	30 Qxd8	Rxd8
12 d5	Nd4	31 Rf7	c6
13 f3	Bh5	32 d6	Rb8
14 f4	f5	33 Rc7	Nf4†
15 fxe	dxex (b)	34 Bxf4	exf4
16 exf	gxf	35 d7	Rd8
17 Nxf5	Bg6	36 Rxb7	Bd4
18 g4	Kh8	37 b4	a5
19 Rf2	Rf7	38 b5	Resigns (c)

- (a) Increasing White's pressure in the center while also restraining Black's counterplay.
- (b) If 15...Nxe5, White gives up his queen for three pieces and a dominating position: 16 Qxd4 Nf3† 17 Nxf3 Bxd4 18 Nxd4.
- (c) The pawns are unstoppable.

Part Four

The Colle System Resume

The Colle System is based on the following development of the White pieces: the centralized triple formation of the pawns on c3, d4, and e3; knights on f3 and d2 and bishop on d3, with the continuation of either Qe2 or Re1; followed by dxc and e4 immediately.

Black choices against the Colle System are the following:

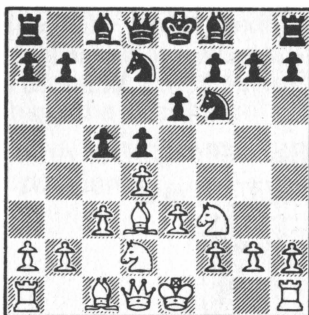

- I - pawns on e6, d5, c5, with the queen knight on d7
- II - pawns on e6, d5, c5, and the queen knight on c6
- III - play the queen's fianchetto (b6 and Bb7)
- IV - play the King's Indian (g6 and Bg7)
- V - develop the queen bishop to f5

We will now review each of these five variations.

* * * * *

I

1 d4 Nf6 2 Nf3 e6 3 e3 d5 4 Bd3 c5 5 c3 Nbd7 6 Nbd2

Black can now continue with the following lines:

- A) 6...Bd6
- B) 6...Qc7
- C) 6...Be7
- D) 6...cxd

A) 6...Bd6 7 0-0 0-0 8 Re1 e5

Black wastes no time in opening the position, and counter chances. If 8...Re8 9 e4 dxe 10 Nxe4 Nxe4 11 Bxe4 cxd 12 Bxh7† Kxh7 13 Ng5† Kg6 14 h4 (threatens 15 h5† Kf6 16 Qf3†, etc.) 14...Rh8 15 Rxe6†! Nf6 (if now 15...fxe 16 Qd3† wins easily) 16 h5† (Colle - O'Hanlon, Nice, 1930) with a quick victory for White. And if 8...Qc7 9 e4 cxd 10 cxd dxe 11 Nxe4 b6 12 Bg5 Nxe4 13 Rxe4 Bb7 14 Rc1 Qb8 15 Rh4 g6 (if 15...h6 16 Bxh6 gxh 17 Rg4† Kh8 18 Qd2 wins) 16 Bb5 (Przepiorka - Prokes, Budapest, 1929) and White has the advantage.

9 e4 cxd 10 cxd dxe 11 Nxe4 Nxe4 12 Bxe4 exd 13 Qxd4

1) 13...Qb6 14 Qd3 Nf6 15 Be3 Bc5 16 Bxc5 Qxc5 (Colle - W. Winter, Match, 1929)

2) 13...Bc5 14 Qc3 Qb6 15 Be3 Bxe3 16 Rxe3 Nf6 (Colle - Varlin, Belgium Championship, 1929)

B) 6...Qc7

Two examples illustrate this variation:

7 0-0 Be7 8 Re1 0-0 9 e4 dxe 10 Nxe4 Nxe4 11 Bxe4 Nf6 12 Bc2 b6 13 Bg5 Bb7 14 Qd3 g6 15 Ne5 Rac8 and after 16 dxc Rfd8 17 Qh3 (threatens 18 Nxf7) 17...Rf8 18 c6 Bxc6 19 Nxc6 Qxc6 20 Qh4, with advantage for White. (Colle - Rubinstein, San Remo, 1930).

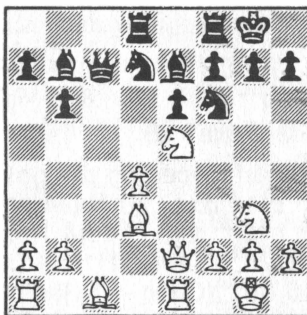

7 0-0 Be7 8 Qe2 0-0 9 e4 dxe 10 Nxe4 Nxe4 11 Qxe4 g6 12 Bh6 Re8 13 Ne5 Nxe5 14 dxe Bd7 15 Rae1 Rad8 16 Re3 Bc8 17 Rh3 (with advantage to White, Havasi - Gemzoe, Hamburg, 1930) 17...Rd5 18 Re1 R5d8 19 Bc2 b5 20 Qe3 b4 21 Bg7!

C) 6...Be7 7 0-0 0-0 8 Re1

In a game Colle - L. Steiner, Budapest, 1929, White played 8 e4 first. There followed 8...dxe 9 Nxe4 Nxe4 10 Bxe4 Nf6 11 Bc2 b6 12 Qe2 (the plan is to bring the rook to d1) 12...cxd 13 Rd1 d3 14 Bxd3 Qc7 15 Bg5 Bb7 16 Ne5 Nd5 and White has the upper hand.

8...b6 9 e4 dxe 10 Nxe4 Bb7 11 Ng3 Qc7

12 Ne5 Rad8 13 Qe2 cxd 14 cxd

Here are a couple of examples of this line in tournament play: (Havasi - Monticelli, Budapest, 1929) 14...Nxe5 15 dxe Qc6 16 f3 Bc5† 17 Kh1 Ng4 18 Rf1 Nf2† 19 Rxf2 Bxf2 20 Be4 Qd7? (why not 20...Ba6!?) 21 Qxf2 Qd1† 22 Qg1 Qxg1† 23 Kxg1 Rd1† 24 Kf2 Bxe4 25 Nxe4, with advantage to White.

But Black's error puts some doubt on this continuation for White. (Colle - Winter, Scarborough, 1929) 14...Nd5 15 Bd2 N7f6 16 Rac1 Qb8 17 Bb1 Rc8 18 Rcd1 Rc7 19 f4 Re8 20 f5 Bf8 21 fxe Rxe6 22 Ne4 Nxe4 23 Bxe4 Bd6 24 Nxf7?? Rxe4!, with advantage for Black.

D) 6...cxd

This continuation makes things easy for White. He will have more freedom of movement for his pieces. We may consider this line too passive for Black.

In a game played at Scarborough, 1929, Colle - Schubert, the game continued as follows:

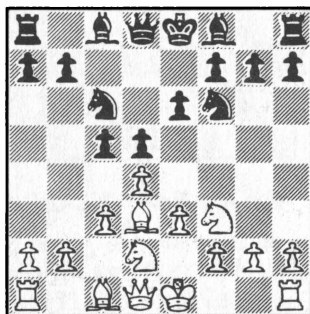

7 exd Bd6 8 0-0 0-0 9 Re1 Qc7 10 Qe2 Re8 11 Ne5 Nf8 12 N2f3 N3d7 13 Ng5 f6 (loses fast, he should have tried 13 ...Bxe5 14 dxe Qxe5 15 Qxe5 Nxe5 16 Rxe5 f6) 14 Qh5 g6 15 Nxc6 fxg 16 Nxf8 Nf6 17 Qxg5+ Qg7 18 Nxh7! Resigns. (If 18...Nxh7 19 Bxh7+ Kxh7 20 Qh5+ Kg8 21 Qxe8+, etc.)

II

1 d4 Nf6 2 Nf3 e6 3 e3 d5 4 Bd3 c5 5 c3 Nc6 6 Nbd2

In bringing the knight to c6, instead of d7, Black may have Nb4 in mind in certain variations as well as preparing e5 for opening the position.

Let us look at a few possible continuations for Black from this position:

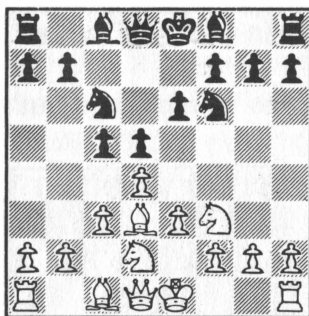

1) 6...Qc7 7 b3 (not quite in the spirit of the Colle System) 7...cxd 8 cxd Nb4 9 Bb5+ Bd7 10 Bxd7+ Nxd7 11 0-0 Rc8 12 Ne1 Bd6 13 Ndf3 Nc2 14 Nxc2 Qxc2 15 Qxc2 Rxc2 16 Bd2 Ke7 17 Rfc1 Rhc8 18 Ne1 with equality. (Sultan Khan - Tartakower, Semmering, 1931)

2) 6...Qb6 7 0-0 Be7 8 dxc Bxc5 9 e4 dxe 10 Nxe4 Be7 11 Qe2 0-0 12 Bg5 Nxe4 13 Qxe4 f5 14 Qe2 Bxg5 15 Nxg5 h6 16 Nf3 e5 17 Nxe5 Nxe5 18 Qxe5 f4 (if 18...Qxb2 19 Bc4† followed by 20 Qe7) 19 Bc4† Kh8 20 Rad1 Qg6 21 Rd6 Qg5 22 Qxg5 hxg 23 h3 (Rosselli - Monticelli, 2nd Match Rome, 1931) and White has slightly better chances.

3) 6...Be7 7 0-0 c4? (It is better to have counter-pressure against White's queen pawn) 8 Bc2 b5 9 e4 dxe 10 Nxe4 0-0 11 Qe2 (threatens 12 Nxf6† and 13 Qe4) 11...Bb7 12 Nfg5 h6 13 Nxf6† Bxf6 14 Qe4 g6 15 Nxe6! fxe 16 Qxg6† Bg7 17 Qh7† Kf7 18 Bg6† Kf6 19 Bh5 Ne7 20 Bxh6 Rg8 21 h4 Bxh6 22 Qf7 mate. (Colle - Delvaux, Ghent, 1929).

4) 6...a6 (the value of this move? None.) 7 0-0 Qc7 8 Qe2 Be7 9 dxc Bxc5 10 e4 dxe 11 Nxe4 Be7 12 Re1 h6 13 Be3 Nd5 14 Rad1 Nf4 15 Bxf4 Qxf4 16 Bc2 0-0 17 Ng3 g6 18 Nd4 Bd7 19 Ndf5 Rfd8 20 Nxe7† Nxe7 21 Rd4 Qc7 22 Qd2 Kg7 23 Rd1 Nd5 24 c4 Nb6 25 b3 f5 26 h4, and White has the superior position (Przepiorka - Gilfer, Hamburg, 1930).

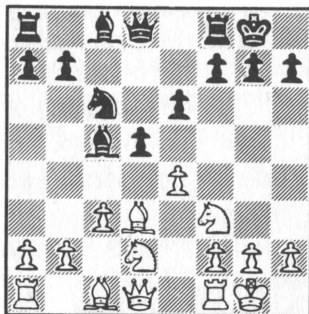

A) 6...Bd6 7 0-0 0-0

The move 7...Bd7 was played in a game between Przepiorka - Havasi, Budapest, 1929. The continuation went as follows: 8 dxc Bxc5 9 e4 Qc7 10 Qe2 dxe 11 Nxe4 Nxe4 12 Qxe4 e5 13 Ng5 Be7 14 Qc4 Bxg5 15 Bxg5 Be6 16 Qc5 f6 17 Be3 b7 18 Qa3 Qe7 19 Be4 Rc8, with a difficult position.

Or 7...Qc7 8 dxc. White can also try for the immediate 8 e4 (Helling - Kashdan, Berlin, 1930) 8...cxd 9 cxd Nb4 10 Bb1 dxe 11 Nxe4 Nxe4 12 Bxe4 Bd7 13 Re1 0-0 14 Bxh7† Kxh7 15 Ng5† Kg6 16 h4 Bh2† 17 Kh1 Bf4 18 Qg4 Bxg5

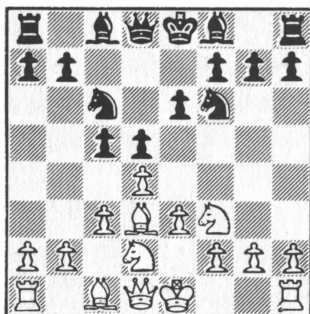

19 Qxg5† Kh7 20 Bf4 Qd8 21 Bd6 Nc2, and Black stands better.

8 dxc Bxc5 9 e4

1) 9...dxe 10 Nxe4 Nxe4 11 Bxe4 Qxd1 12 Rxd1 f6 13 Be3 Bxe3 14 fxe Nd8 15 Rd2 Nf7 16 Rad1 g6 17 Bc2 a6 18 Ba4 (Bb3 looks better) 18...b5 19 Bb3 Ra7 20 Nd4 Re7 21 a4 bxa 22 Bxa4 Kg7 (Colle - Rubinstein, Berlin, 1926) and the position is approximately even.

2) 9...Qc7 10 Qe2 Bd6 11 Re1 Ng4 12 h3 Nge5 13 Nxe5 Nxe5 14 Bb1 Bd7 15 exd exd 16 Nf3 Rae8 17 Be3 Nc4 18 Ng5 g6 19 Nxh7? Rxe3! 20 Nf6† Kg7 21 Nh5† gxh5 22 fxe3 Rh8 (Colle - Ahues, Frankfurt, 1930), and Black has a strong attack.

Position after 6 Nbd2

B) 6...cxd

This reduces the tension in the center.

7 exd

Spassky played 7 cxd in his Candidates' match with Korchnoi, Belgrade, 1978.

7...Bd6 8 0-0 Qc7

In the game Przepiorka - Frank Marshall, Liege, 1930, Black played 8...0-0. There followed: 9 Re1 Nd7 10 Nf1 e5 11 dxe Ndxe5 12 Bc2 Re8 13 Be3 Ng4 14 Qd2 Nxe3 15 Nxe3 Be6 16 Rad1 Bc5 17 Bd3 Qf6 18 Bc2 Rad8 19 Qd3 g6 20 Nxd5 Bxd5 21 Rxe8† Rxe8 22 Qxd5 Re2 23 Rd2 Bxh2† 24 Kf1 Rxd2 25 Qxd2, reaching equality.

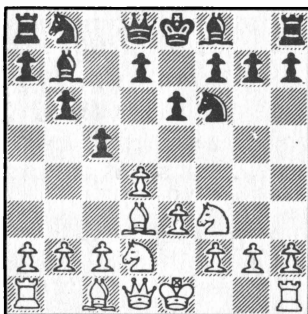

9 Qe2 0-0 10 Re1

And White has a superior position. Two games illustrate the possible continuations:

1) 10...Ne7 11 Ne5 Ng6 12 Ndf3 b6 13 Ng5 Bd7 14 f4 Ne7 15 Ng4 Ng6 16 Bxg6 hxg 17 Qf3 Nh7 18 Nxh7 Kxh7 19 Ne5 Be8 20 Qh3† Kg8 21 Qg4 Kh7 22 Qh4† Kg8 23 Re3 Qe7 24 Qg4 Qf6 25 Rh3 (Colle - Prokes, Budapest, 1929). Black will have a rough time working his way out of this difficult position, brought about mostly by his move 6...cxd.

2) 10...Re8 11 Ne5 Re7 12 Ndf3 Nd7 13 Ng5 Nf8 (Better is Ncxe5 14 dxe Bxe5 15 Qh5 Nf6 16 Bxh7† Kf8) 14 Nxh7 Nxh7 15 Bxh7† Kxh7 16 Qh5† Kg8 17 Re3 Re8 18 Rh3 Kf8 19 Bg5 f6 20 Bxf6, Resigns (There could follow: 20...gxf 21 Ng6† Kg8 22 Qh8† Kf7 23 Qh7 mate. Colle - Soultanbieff, Liege 1930).

1 d4 Nf6 2 Nf3 b6 3 e3 Bb7 4 Nbd2 e6 5 Bd3 c5

See Games 13, 14, and 21, in Part Two, for a full explanation and system of play against this line.

In a game Ahues - Alekhine, San Remo, 1930: 6 c3 Be7 7 Qe2 Nd5 8 dxc bxc 9 Nf1 (better is 9 Nc4) 9...Qc7 10 Ng3 Nc6 11 Bd2 g5 12 c4 Ndb4 13 Bc3 Nxd3† 14 Qxd3 Nb4 15 Qe2 Rg8 16 a3 Nc6, with a dangerous position for both sides.

6 0-0

The main continuations now are 6...Be7 and 6...Nc6.

A) 6...Be7 7 dxc

1) 7 b3 0-0 8 Bb2 cxd 9 Nxd4 d6 10 Qe2 Nbd7 11 Ba6 Qc8 12 Bxb7 Qxb7 13 c4 Nc5 14 Rad1 Rfd8 15 Qf3 Qxf3 16 gxf Rac8 (Tartakower - Spielmann, Carlsbad, 1929).

2) 7 e4 cxd (In the game Colle - Bogoljubov, Carlsbad, 1929, the continuation was 7...0-0 8 c4 d5 9 cxd exd 10 exd cxd 11 Nxd4 Qxd5, with a free game for Black) 8 Nxd4 Nc6 9 Nxc6 dxc 10 Qe2 Qc7 11 f4 Nd7 12 c3 e5 13 f5 Nc5 14 Bc2 Ba6 16 Be3 0-0 (Rubinstein - Gruenfeld, Carlsbad, 1929), with an equal position.

3) Rubinstein - Sultan Khan, Liege, 1930: 7 a3 Nc6 8 c3 d5 9 Ne5 Nxe5 10 dxe5 Nd7 11 f4 c4 12 Bc2 g6 13 Nf3 Nc5 14 Nd4 a6 15 Bd2 Qc7 16 Be1 h5, and an equal position.

7...bxc 8 e4

8 b3 0-0 9 Bb2 Nc6 10 c4 Qc7 11 a3 Ne8 12 h3 f5 13 Qc2 Bf6 14 Bxf6 Nxf6 15 Rfe1 g6 16 e4 Nh5 17 Qc3 Nf4 18 Bf1 Rf7 19 b4 Raf8 20 b5 fxe 21 bxc6 exf3 22 cxb7 fxg 23 Be2 Qxb7 24 Rab1 Qa8 25 Qg3 (Rubinstein - Geiger, Rogatska-Slatina, 1929), with advantage to White.

8...d6

In the game Colle - Sir George Thomas, Nice, 1930, Black played 8...d5.

Continuing from 8...d6, a game between the same two individuals went: 9 e5 dxe 10 Nxe5 Nbd7 11 Ndf3 Nxe5 12 Nxe5 0-0 13 Qe2 Qc7 14 c4 Nd7 15 f4 Bf6 16 Re1 g6 17 Bd2 Bg7 18 Bc3 Rad8 19 Rad1 Nxe5 20 fxe5 Rd7 21 Bc2 Rfd8 22 Rxd7 Rxd7 23 Qf2 Bh6 24 h3 Ba6 25 b3 Bb7 26 Re2 Bg5 27 h4 Be7, with a slight advantage for White (Colle - Sir George Thomas, Liege, 1930).

B) 6...Nc6 7 c3 Qc7

7...Be7 would lead to the previous variation.

If 7...cxd 8 exd Nd5 9 Ne4 f5 10 Ng3 Be7 11 c4 Ndb4 12 Be2 d5 13 a3 Na6 14 Qa4 Nb8 15 cxd Qxd5 16 Bc4 Qd7 17 Re1 Nd8 18 Qb3 0-0 19 Rxe6! (Colle - Przepiorka, Liege, 1930), with advantage for White.

8 Re1 Rc8

8...Be7 9 e4 cxd 10 Nxd4 Ne5 11 Bc2 Ng6 12 N2f3 Ng4 13 h3 N4e5 14 Nxe5 Qxe5 15 Nf5 exf Qd5 16 Qxd5 Bxd5

(Colle - Dr. Max Euwe, Match, Amsterdam, 1928), with equality.

9 Nf1

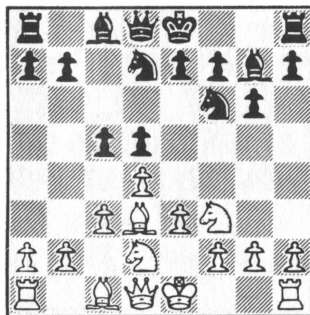

Changes tactics in mid-stream

In the game Przepiorka - Colle, Frankfurt, 1930, Black continued with 9...d5 10 Bd2 Bd6 11 Rc1 O-O 12 dxc Bxc5 13 e4 d4 14 a3 a5 15 c4 Bd6 16 Ng3 Nd7 17 Qe2 Rcd8 18 Bb1 Nde5 19 Nxe5 Nxe5 20 Kh1 a4 and Black had some advantage.

IV

1 d4 Nf6 2 Nf3 d5 3 e3 c5 4 c3 Nbd7 5 Nbd2 g6 6 Bd3 Bg7

Considered by many as the best line against the "obstinate and irritating" Colle System. Let's look at a few examples, with the double fianchetto for Black against the Colle.

1) 1 d4 Nf6 2 Nf3 c5 3 e3 g6 4 Bd3 Bg7 5 O-O b6 6 c3 Bb7 7 Nbd2 O-O 8 e4 d6 9 Re1 Nbd7 10 Nf1 Nh5 11 Be3 e5 12 dxe5 Nxe5 13 Bc2 Nxf3† 14 gxf f5 15 Bb3† Kh8 16 Bd5 Bxd5 17 exd5 f4 18 Bc1 Be5 (Colle - Spielmann, Meran, 1926).

2) 1 d4 Nf6 2 Nf3 g6 3 Nbd2 Bg7 4 e3 c5 5 Bd3 Nc6 6 O-O b6 7 c3 Bb7 8 a3 O-O 9 e4 d6 10 Re1 Nd7 11 d5 Nce5 12 Bc2 f5 13 Ng5 Qc8 14 f4 Ng4 15 exf gxf 16 h3 Ngf6 17 c4 (Akiba Rubinstein - Grau, San Remo, 1930), with advantage to White.

7 O-O O-O 8 e4

In the game Colle - Fairhurst, Scarborough, 1927, Colle continued with 8 Qe2 Re8 9 e4 e5 10 dxe Nxe4 11 Nxe4 dxe4 12 Bxe4 Nxe5 13 Nxe5 Bxe5 14 f4 Bd4† 15 cxd4 Rxe4 16 Qf3 Qxd4†, with advantage to Black.

In the Adolf Seitz - O'Hanlon, Nice, 1930, game after 8 Qe2 Re8 White continued with 9 Ne5 Nxe5 10 dxe5 Nd7 11 f4 Qb6 12 Qf3 e6 13 c4 d4 14 Ne4, with advantage to White.

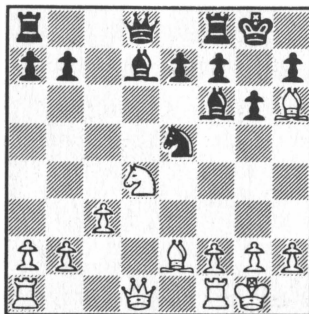

8...dxe 9 Nxe4 cxd 10 Nxd4

In the 1930 Spanish Championship, Golmayo - Rey Ardid continued with 10 Nxf6† Nxf6 11 Nxd4 Qb6 12 Qe2 Qe8 13 h3 e5 14 Nb5 a6 15 Be3 Qd8 16 Na3 Nd5 17 Rad1 Qe7.

10...Ne5

10...Nxe4 11 Bxe4 Nf6 12 Bf3 e5 13 Nb5 Qb6 14 a4 Rd8 15 Qe1 e4 16 Be2 a6 17 Be3 Qc6 (Colle - Montecelli, San Remo, 1930).

11 Nxf6† Bxf6 12 Be2 Bd7 13 Bh6

13 Qb3 Qc8 14 Bh6 Rd8 15 Bf4 Nc6 16 Nxc6 Bxc6 17 Bc4 Qg4 (Colle - Dr. Milan Vidmar, Carlsbad, 1930).

Colle - Ernst Gruenfeld, Carlsbad, 1929, continued 13...Re8 14 Qb3 Qc8 15 Rad1 Rd8 16 Rfe1 a6 17 Rd2 b5.

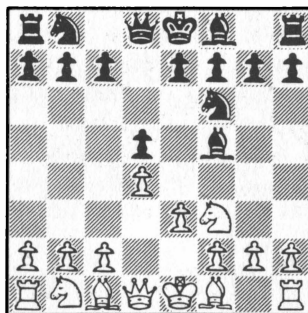

V

1 d4 Nf6 2 Nf3 d5

3 e3 Bf5

With this move Black impedes White from playing the Colle System.

A) 4 c4 c6 5 Nc3 e6 6 Bd3 Bxd3 7 Qxd3 Bb4 8 0-0 Nbd7 9 Nd2 0-0 10 e4 Bxc3 11 bxc3 dxe 12 Nxe4 Nxe4 13 Qxe4 Qa5 14 Qf3 Qa4, with a good game for Black (Colle - Boris Kostic, Nice, 1930).

B) 4 c4 e6 5 Qb3 Nc6 6 c5 Qc8 7 Bb5 Nd7 8 Bxc6 bxc 9 0-0 g6 10 Nbd2 Bg7 11 Nh4 Qa6 12 Nxf5 exf 13 Qc3 Nf6 14 Nb3 Ne4, and Black stands well. (Colle - Aron Nimzowitsch, Frankfurt, 1930).

C) 4 Nbd2 c6 5 Bd3 Bxd3 6 cxd3 e6 7 0-0 Be7 8 Re1 0-0 9 e4 Na6 10 e5 Nd7 11 Nf1 c5 12 dxc Ndx5 13 a3 Qd7 14 b4 Na4 (Colle - Ewfim Bogoljubov, San Remo, 1930).

D) 4 B d3 e6 5 0-0 Bd6 6 c4 c6 7 Nc3 0-0 8 Bxf5 exf 9 cxd Nxd5 10 Qd3 (he might have considered 10 Nxd5 cxd 11 Qb3 Qd7 12 g3) 10...Qd7 11 e4 fxe 12 Nxe4 Na6 13 Ne5 Bxe5 14 dxe Qg4. (Colle - Dr. Max Euwe, Amsterdam, 1928). Black has a good position.

E) 4 Bd3 e6 5 Bxf5 exf 6 0-0 Nbd7 7 c4 dxc 8 Qa4 Bd6 9 Nbd2 0-0 10 Nxc4 Nb6 11 Nxb6 axb6 12 Qc2 Qd7 13 Ne5 Qe6 14 Nc4 Be7, with a passable position for Black (Colle - Dr. Alexander Alekhine, San Remo, 1930).

As we examined in Parts One and Three, Black can avoid some of the solid set-up of the Colle System with three lines of play for Black, namely the Gruenfeld Defense with d5 and c5; the King's Indian Defense; and the 3...Bf5 line of play.

* * * * *

The reader must have recognized by now from this remarkable collection of games that the Colle System was once one of the most fashionable openings in tournament practice. The fact that it has been replaced (perhaps temporarily) by other openings currently considered fashionable does not mean that it has been discredited. The chess world is treated to an ever changing cycle of opening fads, as a master introduces an opening, is quite successful with it for a period, and then drops that line for another as everyone becomes familiar with its nuances. To demonstrate that the Colle System is still a viable tournament weapon, take a look at this game from Lone Pine 1978, W. Lombardy - A. J. Mestel: 1 d4 d5 2 Nf3 e6 3 e3 Nf6 4 Nbd2 Be7 5 Bd3 0-0 6 0-0 Nbd7 7 Ne5 Nxe5 8 dxe Nd7 9 f4 g6 10 b3 f6 11 exf Bxf6 12 Rb1 e5 13 Ba3 e4 14 Bxf8 Qxf8 15 Be2 Qc5 16 Kf2 g5 17 b4 Qb6 18 Nxe4 dxe 19 Qd5† Kg7 20 fxg Be5 21 Bc4 Kg6 22 Qg8† Kh5 23 Be2† Kh4 24 g3† Kh3 and Black resigned (25 Qxh7† mates).

Points To Remember

- 1) The idea behind the Colle System is solidity first -- and then attack.
- 2) To play the Colle System well -- **you must know the ending well also.**
- 3) Three pawns vs. two on the queenside. Once you have obtained that, exchange as many of the pieces, except one, be it a bishop or a knight. That will help in holding the advantage in the endgame phase of the game.
- 4) Get your pawn to **e4** (NOT TOO SOON — NOT TOO LATE) This is a key problem in the Colle System. Your opponent **can** stop you from playing e4, but only at the expense of creating some weakness in his defense.

When you have your pawn on e4, and pawns on d4 and c3, then, if your opponent has *not* taken the king's pawn, you push the pawn to e5. That pawn will be a thorn in the opponent's side. You must ask yourself then: What do I do to develop the knight on d2? Your idea then is to place your king's rook on e1, and bring the knight to f1, followed eventually by h3, g4, Ng3 for a build-up for attack on the kingside.

- 5) If Black plays cxd4 in the early stage of the game, **how should you retake?** With the e-pawn or the c-pawn? Boris Spassky, ex-world champion, mostly plays cxd4, so that he will have an open file for his queen rook on c1. I recommend exd4, so that you get an open file for your rook on the e-file. Both are playable, and you alone can decide which suits your style of play best.
- 6) Keep your king bishop as long as it serves your purpose. Bear in mind that the sacrifice of that bishop on h7 is one of the high-points in the Colle System.
- 7) You do not have to be ORTHODOX about sticking completely to the Colle line if your opponent varies. For example, if after 1 d4 Nf6 2 Nf3 g6, I recommend 3 g3. You could continue with the regular Colle set-up, too, if you wish. It's a fielder's choice. Experiment. You will learn more in that way.

After 1 d4 Nf6 2 Nf3 d5 3 e3 Bg4 4 c4! e6 5 Qb3 (This is better than 5 Nc3) 5...Bxf3 6 Qxb7 Bxg2 7 Bxg2 Nbd7, and White will remain a pawn ahead.

Another line is: 1 d4 Nf6 2 Nf3 e6 3 e3 c5 4 c3 (Keep this move in reserve until Black has played d5. Then you can still decide if you want to continue in the orthodox Colle, or turn it into a regular Queen's Gambit by playing c4. **IMPORTANT POINT TO REMEMBER**) 4...Nc6 5 Bd3 d5 6 Nbd2 b6, White now has the choice of:

1) 7 O-O, 2) 7 dxc, or 3) 7 e4.

Let's look at that last line:

7 e4 dxe 8 Nxe4 cxd 9 Nxf6† gxf (If 9...Qxf6 10 Bg5 and the queen is trapped!) **10 cxd** (Also possible is 10 Be4 Bd7 11 Nxd4 Nxd4 12 Qxd4 [Best, as after 12 Bxa8 Qxa8 13 Qxd4 Qxg2 14 Rf1 Bc5 15 Qxf6 Bb5 16 Qxh8† Kd7 and Black has winning chances.]).

8) **Remember:** You are supposed to be the weaker player. Thus you play for a draw, which is easier said than done, and when you feel you have a good developed position -- you then look for advantages. **Your opponent**, the stronger player, will have to crash your position, not an easy task against the Colle System set-up -- which will give you possibilities you otherwise would not have. If he is willing to draw, then you benefit too!

9) Count on losing a lot of Colle games until you begin to understand and fully take advantage of the ideas and tactics explained in this book. **SO DON'T BE DISHEARTENED.** You might have lost a lot of games with other openings, too. **SO DON'T QUIT!**

10) **Study two hours a week.**

11) Play at least one serious game a week.

12) Write down all serious games you play. Put the score sheets away. Two to three months later look at those games you played. You will soon realize how you have improved!

13) Let me repeat: To play the opening well, especially the Colle, **Do Not -- I Repeat -- Do Not Neglect To Learn The End-game.** Feel that the ending is MORE important than the opening. You will know in what direction to steer your game -- to your advantage.

14) Are you a member of the United States Chess Federation? You should be. Then you would get a national rating and could play in tournaments which show your improvement with the rating points you earn. Your game will improve through the monthly chess magazine you receive. Write to 186 Route 9W, New Windsor, NY 12550. *Tell them I sent you!!*

International Grandmaster George Koltanowski's Colle System has reached the twelfth edition, with this translation of this highly popular book into algebraic notation. Much of the success of this book is due to the innate ability of Koltanowski to convey the concepts clearly and simply. This book really teaches how to understand and play an opening. For this reason the book has endured to become a classic. Koltanowski emphasizes the importance of understanding the role of the opening in leading into winning endgame positions. The book contains a large selection of games to illustrate the author's points.
